1. PRECAUTIONS

1.1 Important Remark

WARNING: SHOCK HAZARD - DO NOT OPEN

AVIS: RISQUE DE CHOC ÉLECTRIQUE - NE PAS OUVrir

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING (If applicable): The terminals marked with symbol of "⚡" may be of sufficient magnitude to constitute a risk of electric shock. The external wiring connected to the terminals requires installation by an instructed person or the use of ready-made leads or cords.

WARNING: To prevent fire or shock hazard, do not expose this equipment to rain or moisture.

WARNING: A device with Class I construction shall be connected to a mains socket-outlet with a protective earthing connection.

WARNING: This product must not be discarded, under any circumstance, as unsorted urban waste. Take to the nearest electrical and electronic waste treatment centre.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

1.2 Important Safety Instructions

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this device near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other device (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at the plugs, convenience receptacles, and at the point where they exit from the device.
11. Only use attachments/accessories specified by the manufacturer.

12. Unplug the device during lightening sorts or when unused for long periods of time.
13. Refer all servicing to qualified personnel. Servicing is required when the device has been damaged in any way, such as power supply cord or plug is damaged, liquid has been spilled or objects have fallen into the device, the device has been exposed to rain or moisture, does not operate normally, or has been dropped.
14. Disconnecting from mains: When switching off the POWER switch, all the functions and light indicators of the unit will be stopped, but fully disconnecting the device from mains is done by unplugging the power cable from the mains input socket. For this reason, it always shall remain easily accessible.
15. Equipment is connected to a socket-outlet with earthing connection by means of a power cord.
16. The marking information is located at the bottom of the unit.
17. The device shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on device.

1.3 Cleaning

 **Clean the unit with a soft, dry clean cloth or slightly wet with water and neutral liquid soap only, then dry it with a clean cloth. Be careful that water never gets into the unit through any hole. Never use alcohol, benzine, solvents or abrasive substances to clean this unit.**

NEEC AUDIO BARCELONA, S.L. accepts no liability for any damage that may be caused to people, animal, or objects due to failure to comply with the warnings above.

**Thank you for choosing our device Ecler
VEO-SWC44 / VEO-SWC44TH / VEO-SWC44TU !
We appreciate your trust.**

It is **VERY IMPORTANT** to carefully read this manual and to fully understand its contents before any connection in order to maximize your use and get the best performance from this equipment.

To ensure optimal operation of this device, we strongly recommend that its maintenance be carried out by our authorised Technical Services.

Ecler VEO-SWC44 / VEO-SWC44TH / VEO-SWC44TU comes with a 5-year warranty.

2. PACKAGE CONTENTS

- VEO-SWC44.
- Antenna (3 units). Not pre-mounted to avoid damages.
- First Steps Guide.
- Warranty card.

3. DESCRIPTION and FEATURES

VEO-SWC44 is a wireless conferencing and presentation switcher with Full HD video resolution wireless inputs and a 4K / UHD HDMI 2.0 video output. It supports wireless connection for USB devices like webcam and mic via wireless transmitter, Windows & macOS applications, as well as Airplay, Miracast and Chromecast compliant. An integrated audio de-embedder provides stereo unbalanced analogue output on a 3,5mm jack connector. It includes a WebGUI for configuration and management as well as RS-232, TCP/IP remote control, all enabled by a pair of LAN RJ-45 connectors with independent networks available. It can display to 4 simultaneous devices in a multi-view layout. Adds smart EDID management and supports HDCP 2.2 as well as PoE powering supply.

3.1 Main Features

- USB 3.0 ports for wireless connection between a laptop and room USB devices like camera and mic for an easy video conference.
- Wireless input up to Full HD video resolution and a HDMI 2.0 4K / UHD video output.
- Analogue audio extraction on stereo unbalanced 3,5mm jack connector.

- Support for native wireless mirroring protocols like Airplay Chromecast and Miracast for a flawless presentation.
- Plug-n-play by optional wireless transmitters HDMI VEO-SWC44TH or USB Type-C VEO-SWC44TU as well as Windows and macOS apps for wireless connection with a laptop or PC.
- RS-232 and IP control as well as WebGUI management.
- Extra security layer for an encrypted wireless transmission.
- Support for up to 4 simultaneous split screen view presentation as well as up to 16 participants on hold.
- Customizable background image or logo for the Home Screen page.
- Support wireless touchback for interactive screen as well as whiteboard and live annotation tool.
- Support for PoE.
- Local 12V DC power supply.

3.2 Optional Accessories

Wireless transmitters: VEO-SWC44TH and VEO-SWC44TU, used for plug & play wireless mirroring from personal PC or mac desktop to the main screen.

- **VEO-SWC44TH** is a HDMI wireless transmitter that allows participants to easily share content from a laptop or HDMI device to the VEO-SWC44 base unit. Power is supplied by an auxiliary USB Type A connector. It is designed as a cross platform and plug and play device with no additional driver installation needed. This technology allows to start a transmission and begin sharing content by just connecting the wireless transmitter into the source and pushing the surface. A LED indicator and a vibration driver, both allow the user to know the status of the wireless transmitter at any time.
- **VEO-SWC44TU** is an USB-C wireless transmitter that allows participants to easily share content from a laptop or USB-C video device to the VEO-SWC44 base unit. Power is supplied directly through the same connector. It is designed as a cross platform and plug and play device with no additional driver installation needed. This technology allows to start a transmission and begin sharing content by just connecting the wireless transmitter into the source and pushing the surface. A LED indicator and a vibration driver, both allow the user to know the status of the wireless transmitter at any time.

4. INSTALL & CONNECT

4.1 Wall Mount Install

The VEO-SWC44 can be installed on the wall or flat surface. At the bottom of VEO-SWC44, there are two mounting holes that can be fixed to a surface using flat screws.

⚠️ Mounting screws are not included in the VEO-SWC44 box. The **type of screws depends on the type of wall** (stone, wood, plasterboard, ...) you are mounting the Base Unit VEO-SWC44 to. **Make sure the head of the screw is not larger than the hole in the bottom of base unit VEO-SWC44.**

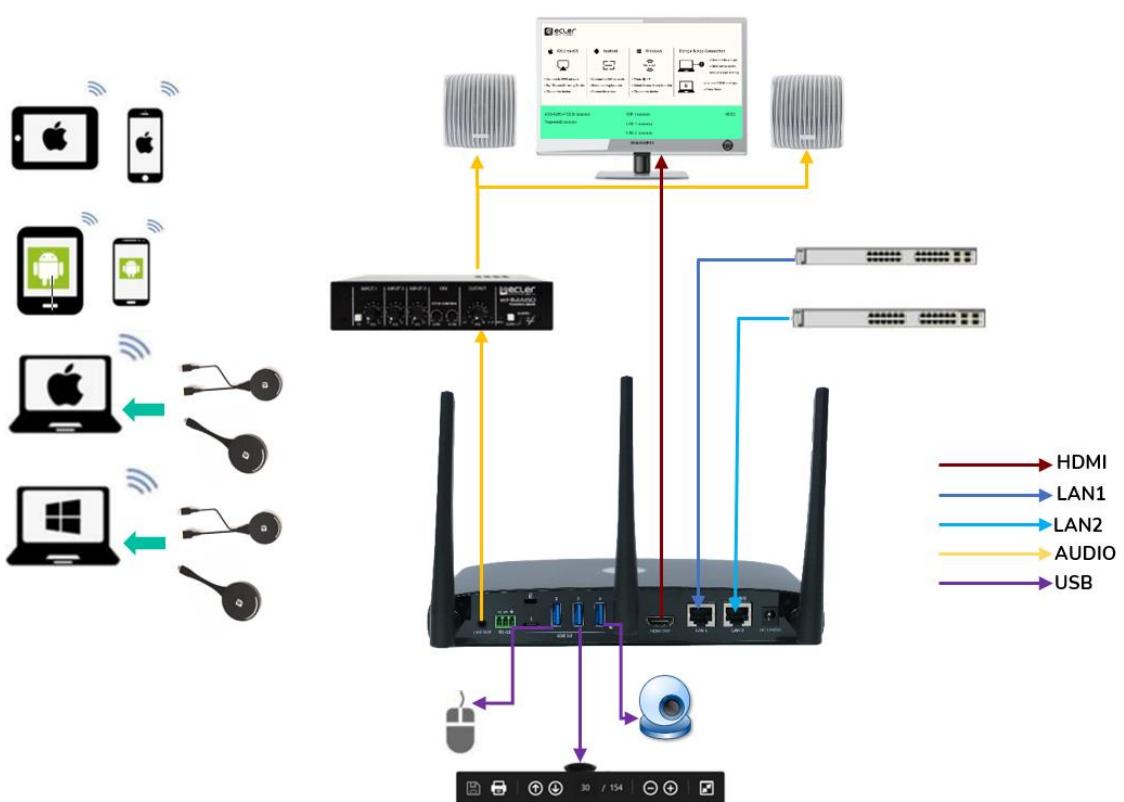

⚠️ For optimal performance, install the VEO-SWC44 close to the display and avoid obstacles between the VEO-SWC44 and the Transmitters.

⚠️ Antenna Placement

- The antennas should be **oriented vertically**, so perpendicular to the ceiling and parallel to the walls.
- The antennas **should be installed far enough (at least 50cm/1.6ft)** from metallic surfaces to avoid unwanted reflections **and far enough (at least 1m/3.3ft)** from other radio equipment that operates in the same frequency range, e.g. other WiFi access points, cordless telephone, microwave ovens, etc. It is also best to install antennas at least 15 cm (6 inches) from concrete walls.
- The **most favourable situation is a direct line of sight between antennas and buttons**. Any obstruction will cause the signal to follow a longer propagation path, which can result in performance degradation.
- Due to the particular radio pattern of the dipole antennas, the **antennas should not be placed just above potential positions of VEO-SWC44 users**. As a result, the advised position for the antennas is at the side of the meeting room.

TECHNICAL DATA	

4.3 Power Connection

- Local Power Source

1. Plug the power connector to the power adapter to the power input connector of the Base Unit VEO-SWC44.
2. Choose the appropriate power plug (US, UK, EU or AU) to be installed on the power adapter.

3. Connect the power cable plug into the wall outlet.

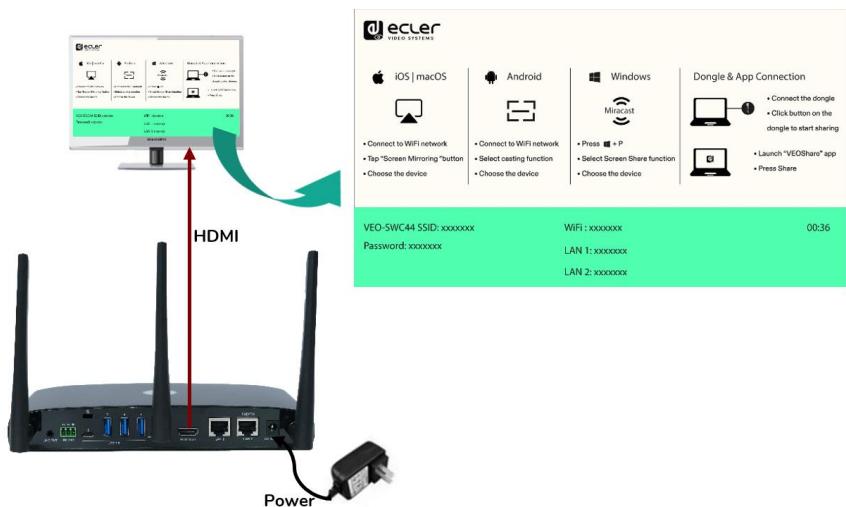

Once the VEO-SWC44 is powered it is recommended to **use the POWER button** on the front of the VEO-SWC44 to switch ON or OFF.

- Power over Ethernet

If the LAN Ethernet switcher supports PoE (Power over Ethernet), LAN 2 port can be used to power up the Base-unit VEO-SWC44 instead of using the external power adapter. (LAN2 Port of the unit supports PoE).

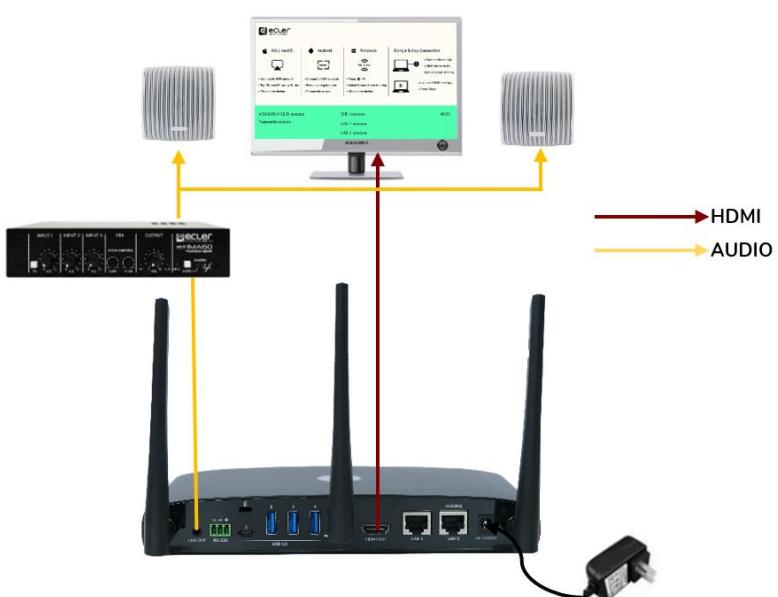

4.4 Video Connection

1. Connect the HDMI Output of VEO-SWC44 to a 4K or Full-HD display by a HDMI cable.
2. After starting up, the system displays the home page, as shown below.

4.5 Audio Connection

1. Connect an audio cable with mini jack socket 3.5mm connector into the audio of the VEO-SWC44.
2. Connect the other side to the meeting room's sound system.

 **VEO-SWC44TH and VEO-SWC44TU can transmit audio to the VEO-SWC44 base unit when the audio output of the source device is selected.**

TECHNICAL DATA	UCC Manager

4.6 LAN Connection

1. Connect a network cable with RJ-45 connector into the LAN 1 or LAN 2 port of Base Unit VEO-SWC44.
2. Connect the other side to LAN. DHCP on the VEO-SWC44 switcher is enabled per default.
 - a) If there's a DHCP server in the network, IP address will be assigned automatically.
 - b) If there is no DHCP server in the network, VEO-SWC44 will require to manually configure a static IP address. [For further information, see chapter Network Settings.](#)

 If the LAN Ethernet switcher supports PoE (Power over Ethernet), **LAN 2 port of the VEO-SWC44 allows to power the switcher instead of using the external power adapter included.**

 **Wireless Direct Mode is enabled by default. In this network mode, VEO-SWC44 generates its own wireless SSID with IP address 192.168.43.1.** For further information on how to properly configure the network settings according to the needs of the application. [see chapter Wireless Network.](#)

 **The LAN connection can be used for:**

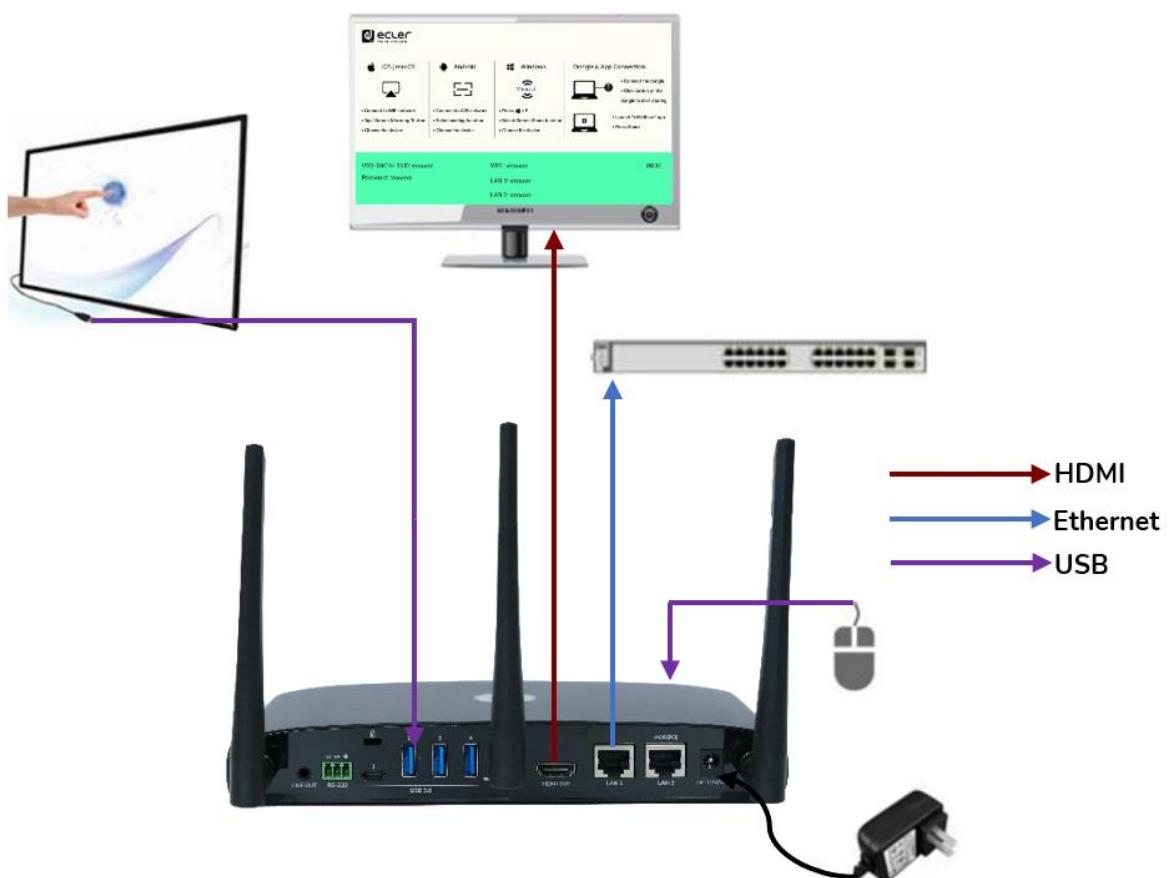

- Network integration of VEO-SWC44 in guest or company network.
- Telnet control the VEO-SWC44.
- Maintenance purpose.
- Over-The-Air -Update (OTA) of firmware of VEO-SWC44.

4.7 USB Control Devices Connection

If the user **connects an USB Mouse or Touchscreen**, the following features will be available:

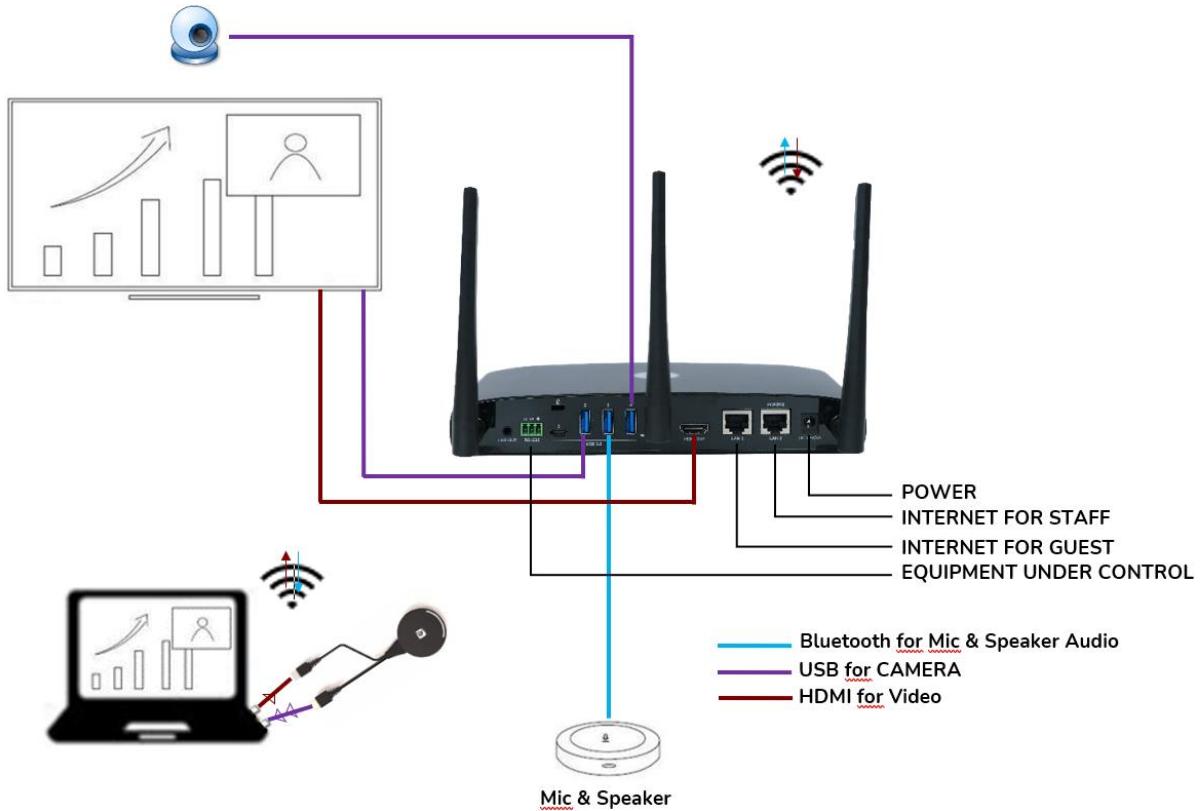

- **Moderator tab** to manage the active users sharing content with the VEO-SWC44.
- **White board or annotation** during a presentation.
- **USB-HID function** for laptop control and click function of a touchscreen:
 - **USB mouse:**
 - Single click to select.
 - Right-click to back to the Home Page.
 - **Touch screen:**
 - Click to select.
 - Long press to open the contextual menus, as double-click or click the right button of a USB mouse.

5. START-UP and OPERATION

5.1 Home Screen

When a user connects the VEO-SWC44 base unit to a HDMI display, the following Home Screen is displayed:

- iOS Quick Start:** Steps to start sharing content wirelessly using Airplay on iOS and macOS.
- Android Quick Start:** Steps to start sharing content wirelessly using an Android device.
- Windows Quick Start:** Steps to start sharing content wirelessly using a laptop that supports Miracast transmission.
- Wireless Transmitters & VEOShare:** Steps to start sharing content wirelessly using VEO-SWC44TH / VEO-SWC44TU wireless transmitters or VEOShare app.
- WiFi Indicator:** Indicates the signal quality of the current wireless network connection.
- ID:** Indicates the WiFi SSID name or the assigned VEO-SWC44 device name.
- Password:** Shows the WiFi password needed to gain access to VEO-SWC44.

8. **Password timer:** It shows the time until the password is changed automatically.
It is only displayed when timer is active.
9. **Refresh WiFi password:** Generates a new password network.
10. **Security level:** Clicking on the icon a pop-up window will appear, displaying the security profile currently selected amongst the three levels available.
11. **Download Button:** Clicking on this icon will create a USB launcher drive containing VEOShare app.
12. **Info:** Clicking on this icon will show / hide Network information of the Home screen.
13. **WiFi / IP LAN IP:** WiFi IP: address of VEO-SWC44 in wireless LAN / Assigned IP: address of VEO-SWC44 in LAN. “N/A” means the VEO-SWC44 base unit is not connected to any WiFi / LAN networks, or it failed to get an available IP address by the assigned DHCP server. In this case, [see chapter Network settings](#).
14. **Camera and microphone icon indicator:** It is only displayed accordingly a USB camera or microphone is connected to the VEO-SWC44 base unit. When lighted in green, USB device is being used. Otherwise, is only connected.
15. **Time:** Displays current time. If VEO-SWC44 base unit has access to a time server through wireless or LAN connection, time code will be set automatically.

5.2 Pairing VEO-SWC44TH and VEO-SWC44TU with VEO-SWC44

Connecting VEO-SWC44TH (HDMI wireless transmitter) to USB Type A port or VEO-SWC44TU to USB-Type C port will start pairing process automatically. They should be connected one at a time.

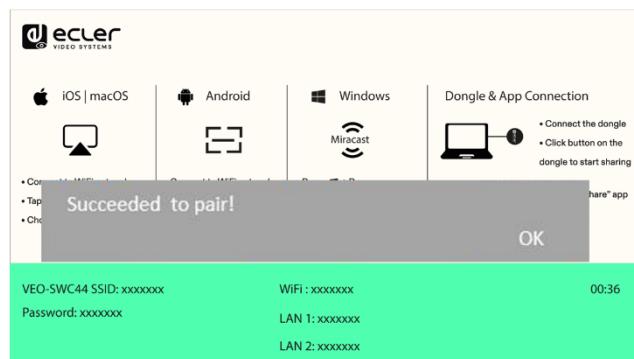

⚠️ A transmitter can only be paired to one base unit and will always re connect to the one that was last paired to.

Once a transmitter is plugged, a message indicating that wireless transmitter is booting will be displayed.

After completing the pairing, the message table displays “**Succeeded to pair!**” on the home page, as shown. Then, the transmitters can be unplugged and used for screen sharing content.

⚠️ If error-message “Configuration fail” is displayed, check the connection of USB/type C to keep stable after plug-in and try again.

⚠️ After changing the SSID / WiFi channel in Web GUI settings menu, all the transmitters must be paired again. Transmitters that need assigning to another VEO-SWC44 base unit must be paired again.

HW	Web GUI	Management & Configuration	Network Settings	Display & Audio	Moderator Control	System Settings	Security Settings	Firmware Upgrade	PANEL FUNCTIONS & WIRELESS TRANSMITTERS	TROUBLESHOOTING	UCC Device Manager	TECHNICAL DATA
PRECAUTIONS	PACKAGE CONTENTS	DESCRIPTION & FEATURES	INSTALL & CONNECT	START-UP & OPERATION	FIRMWARE UPDATE							

5.3 Wireless Presentation Mode

VEO-SWC44 can be used to wirelessly share the screen of AV sources. VEO-SWC44 can mirror 4 sources onto main display simultaneously, which supports PC/Laptop and mobile devices.

5.3.1 Screen Sharing using VEO-SWC44TH and VEO-SWC44TU

1. Pair VEO-SWC44TH or VEO-SWC44TU to VEO-SWC44 base unit, [see chapter Pairing VEO-SWC44TH and VEO-SWC44TU with VEO-SWC44](#).
2. Plug VEO-SWC44TH to the USB-A port and HDMI port or VEO-SWC44TU to USB-C port of the device that is going to share its content.
3. LED indicator will show static green when ready. Touching the surface will start wireless presentation and LED indicator will show static red.
4. Touching the surface again will stop wireless presentation and LED indicator will go back to static green.

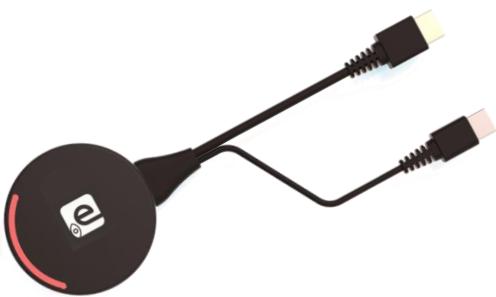

VEO-SWC44TH

VEO-SWC44TU

5. When LED is static red, the content is mirroring to the main screen connected to the VEO-SWC44 base unit.

VEO-SWC44TH

VEO-SWC44TU

[See chapter LED Indicator for further information on LED status.](#)

5.3.2 Screen Sharing using VEOShare Desktop Application

VEOShare app is the launcher that lets the user screen share content with VEO-SWC44 base unit wirelessly from any source device which hosts it (mac, PC...). Just copying the launcher to the internal storage will let the user run VEOShare app.

Setting up VEOShare

There are **two ways of getting VEOShare desktop app:**

1. Downloading from WEB page

Application can be downloaded from the website by connecting the device (laptop / Android) to the same network as the VEO-SWC44 controller.

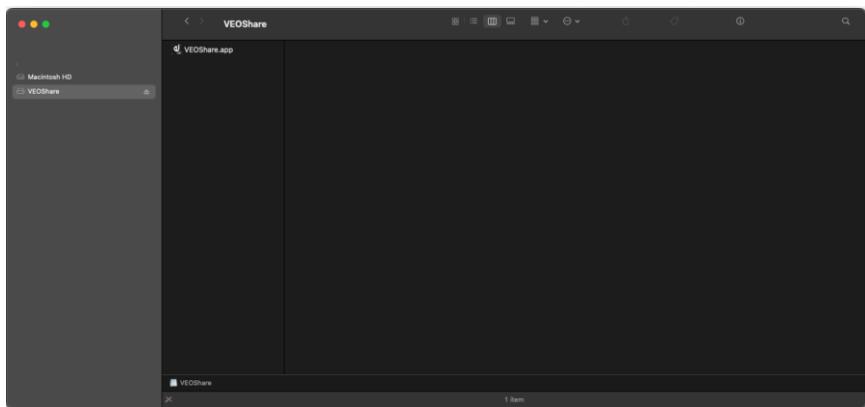

2. VEO-SWC44TH / VEO-SWC44TU internal store

Wireless transmitters will also act as a USB flash drive that hosts the VEOShare app to be drag and dropped to the laptop.

HW	Web GUI	Management & Configuration	Network Settings	Display & Audio	Moderator Control	System Settings	Security Settings	Firmware Upgrade	Other Settings	UCC Device Manager	TECHNICAL DATA
PRECAUTIONS	PACKAGE CONTENTS	DESCRIPTION & FEATURES	INSTALL & CONNECT	START-UP & OPERATION	FIRMWARE UPDATE	PANEL FUNCTIONS & WIRELESS TRANSMITTERS	TROUBLESHOOTING				

- **macOS**

1. Plug VEO-SWC44TH / VEO-SWC44TU into USB-A / USB-C port.
2. Go to the Finder and select the external USB flash unit.

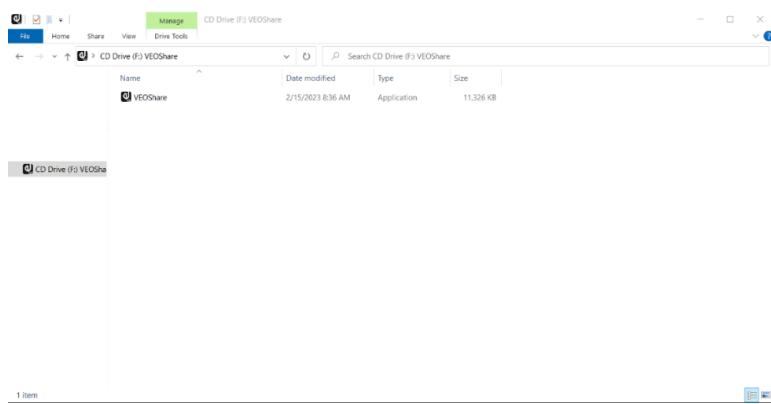

3. Copy VEOShare app to local storage

- **Windows**

1. Plug VEO-SWC44TH / VEO-SWC44TU into USB-A / USB-C port.

Go to the File Explorer and select the external USB flash unit.

2. Copy VEOShare app to local storage.

💡 The first time that user connects laptop with VEO-SWC44 over WiFi, when the application detects that unit is connected to camera, mic&speaker, it will pop out the message bar indicating to install a virtual driver to activate USB over WiFi function, in order to start video conferencing via VEO-SWC44, as below steps.

💡 The virtual driver is only for video conferencing, user can normally mirror desktop without it installed. If the VEO-SWC44 is not connected with camera, mic&speaker, it will not pop out message to install driver, user could mirror desktop as well.

HW	Web GUI	Management & Configuration			Network Settings			Display & Audio			Moderator Control			System Settings			Security Settings			Firmware Upgrade			Panel Functions & Wireless Transmitters			Troubleshooting			Technical Data		
PRECAUTIONS	PACKAGE CONTENTS	DESCRIPTION & FEATURES	INSTALL & CONNECT	START-UP & OPERATION	FIRMWARE UPDATE	PANEL FUNCTIONS & WIRELESS TRANSMITTERS	TROUBLESHOOTING	OTHER SETTINGS	UCC DEVICE MANAGER	TECHNICAL DATA	OTHER SETTINGS	UCC DEVICE MANAGER	TECHNICAL DATA	OTHER SETTINGS	UCC DEVICE MANAGER	TECHNICAL DATA	OTHER SETTINGS	UCC DEVICE MANAGER	TECHNICAL DATA	OTHER SETTINGS	UCC DEVICE MANAGER	TECHNICAL DATA	OTHER SETTINGS	UCC DEVICE MANAGER	TECHNICAL DATA						

- **Starting and Operating VEOShare app**

Once VEOShare app is copied into the local storage of the Laptop, it is ready for use.

1. **Open VEOShare app** on the source device. The available VEO-SWC44 switcher will show if source device and the switcher are on the same network.

2. **Connect the laptop to WiFi network displayed on the Home Screen** ("Guest", "Staff"), or connect to the LAN on the network **using a network cable**.
3. **Double-click the VEOShare app**. A list of all available VEO-SWC44 base units in the same network will be displayed. select the device to connect to. The connections are password protected (lock icon ).
4. **Enter VEO-SWC44 password** and **click "connect"**, the system is ready to share.

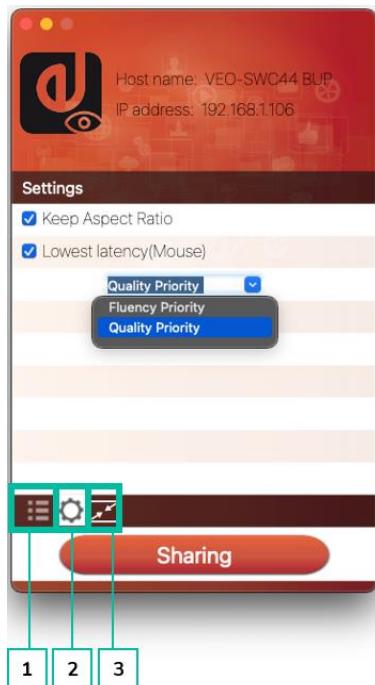

Manually connection by entering the name (SSID) or IP address **is also possible** if base unit is not appearing. (click  icon).

5. VEOShare app layout will turn to green. **Clicking "Ready to share" will start sharing content** with the main display connected to the VEO-SWC44 HDMI output. When window colour is static red, the desktop is mirroring to the main screen.
6. **Clicking "Sharing" will stop sharing content**. Window colour is static green again.

- **Keep Aspect Ratio:**

This parameter will apply the original aspect ratio of the main screen.

- **Stream Mode:**

This parameter will adapt the performance to fit the desired application:

- **Fluency Priority:** (Default) Image transmission delay is small, image resolution will be lower, suitable for PPT presentation mode.
- **Quality Priority:** The image resolution is relatively high, but when the image content is complex, the transmission delay will be relatively larger, suitable for watching video.

- **Lowest Latency Mouse:**

The setting is applied individually on every VEOShare host device only. The shape of mouse-pointer is equal to the shape in the application used. This parameter significantly improves the mouse response (approximate latency is under 20ms).

- **Volume Slider:**

This parameter will adjust the playback volume of the main screen when presentation mode is in use.

Not available in macOS

3. Full Screen

By clicking full screen icon  on PC UI interface, or long press the wireless transmitter, the content will be full displayed on screen. Click or short press again, will get the screen back to quad view mode.

5.3.3 Screen Sharing using Airplay

On iOS and macOS devices a user can stream his screen or sound wirelessly to VEO-SWC44 base unit via Airplay protocol.

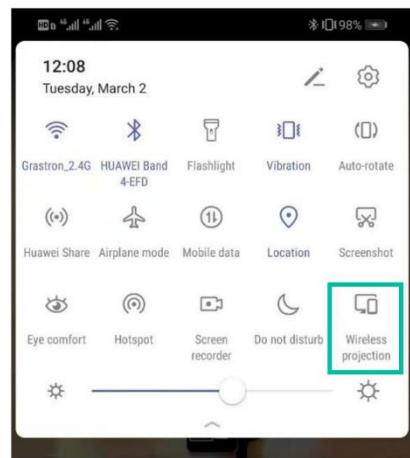

1. Connect the iOS or macOS device to the same WiFi network that VEO-SWC44 is connected to.
2. Show the control centre. Click the Airplay icon  on your iOS and macOS device and select the target VEO-SWC44 to start sharing content with the VEO-SWC44.

5.5 Moderator Preview Window

VEO-SWC44 includes a **moderator preview window** that will let the user choose which of the online devices is displayed on the main screen, turn on and off wireless casting on any device or control volume playback.

! In order to show, hide or manage moderator tab, a **USB HID compatible device connected to the VEO-SWC44 base unit** is necessary (Touchscreen, mouse...).

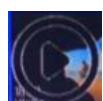

Preview windows of all connected transmitters, VEOShare app users and Airplay / Miracast / Chromecast screen sharing devices will appear on the tab. Various window prefixed layouts can be selected on Moderator section of WEB settings, see chapter [Moderator Layout](#).

💡 Four users are allowed to present simultaneously and 16 more can be connected to VEO-SWC44 base unit in standby.

Moderator Preview Control Buttons:

1

Click to start transmission.

Click to stop mirroring the current participant.

Click to make this device full screen on main screen.

Click to adjust the volume of connected participant.

2

Arrow to show moderator tab.

3

Whiteboard and Annotation. For further details, see below.

5.6 Whiteboard & Annotation

Whiteboard and Annotation requires an **USB HID compatible device**, such as interactive white board, touch screen or mouse. There are two different modes:

5.6.1 Whiteboard

A white board is brought up that **will let the user to write notes, draw content**. It allows different figures, colours and background. To start Whiteboard, mode **click**  **on** the **Home Screen**.

Use the toolbar to select one of the following functions.

ID	Icons	Function
Tool bar 1		Add an empty page.
		Delete current page.
		Display previous or next page.
Tool bar 2		Undo: one step backward in changes.
		Redo: one step forward in changes.
		Erase part of drawings or annotation, change diameter by a longer tap.
		Clear the entire drawing/writing on the screen.

HW	Web GUI	Management & Configuration	Network Settings	Display & Audio	Moderator Control	System Settings	Firmware Update	PANEL FUNCTIONS & WIRELESS TRANSMITTERS	TROUBLESHOOTING	TECHNICAL DATA
PRECAUTIONS	PACKAGE CONTENTS	DESCRIPTION & FEATURES	INSTALL & CONNECT	START-UP & OPERATION						

		Pen allows writing/drawing in different colours.
		Draw basic geometric shapes.
		Select colour of board, the drawing will be kept.
Tool bar 3		will pop up, when "Pen" or Draw shape or Select colour of board is selected, for individual change of size of Pen, Shape or colour.
Tool bar 4	 	Save the current screenshot on local storage (PNG+WMN). Close Whiteboard to go back to Home Screen, actual project can be saved on local storage (WMN).
File options	 	<ul style="list-style-type: none"> • Open WMN-file from local storage and continue/edit an older project. • New project • Save as WMN on local storage in unit, it will be erased after POWER-OFF. • Import from U disk stored project (WMN). • All pages are saved as PDF on local storage. • Clear history – delete all whiteboard & annotation files on local storage.

5.6.2 Annotation

Allows the user **to draw or write annotations in overlay within the presented content of the active sharing devices**. It allows different figures, colours, and background.

To start Annotation mode, click  on the Home Screen.

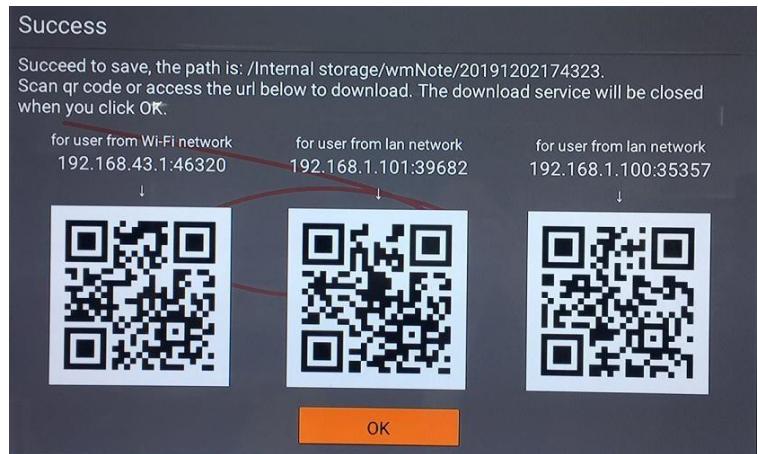

Use the toolbar to select one of the following functions.

ID	Icons	Function
Tool bar 1		Undo: one step backward in changes
		Redo: one step forward in changes
		Erase part of drawings or annotation, change diameter by a longer tap
		Clear the entire drawing/writing on the screen
		Pen allows writing/drawing in different colours
		Draw basic geometric shapes
		Select colour of board, the drawing will be kept
		Close Whiteboard to go back to Home Screen, actual project can be saved on local storage (WMN).
		Save the current screenshot on local storage (PNG+WMN).

6. WebGUI SETTING MANAGEMENT & CONFIGURATION

To access VEO-SWC44 WEB settings it is necessary to enter the base unit IP address in an internet browser. The first page displayed will let the user download VEOShare app for all platforms.

 If VEO-SWC44 is on “Wireless direct Mode”, first access VEO-SWC44 SSID and enter current password on Home Screen page. IP address is 192.168.43.1. [For further information on how to configure network, see chapter Network Settings.](#)

1. Click  on the top right corner to enter into WEB Settings menu.

2. Login page will appear.

Default user: admin

Default password: admin

 Entering Login credentials will give access to the main WEB settings page where it will be able to configure Network settings, Display & Audio, Moderator control, System settings, Security settings, Firmware upgrade, Other settings, About device.

6.1 Network Settings

To take the full benefit of VEO-SWC44 features, it is important to configure and integrate the base unit network settings according to the needs of the application required. VEO-SWC44 includes two independent wired LAN and a WiFi network card.

The following sections can be accessed in Network Settings page:

6.1.1 Wireless Network

This section allows the user to set the network working mode of VEO-SWC44.

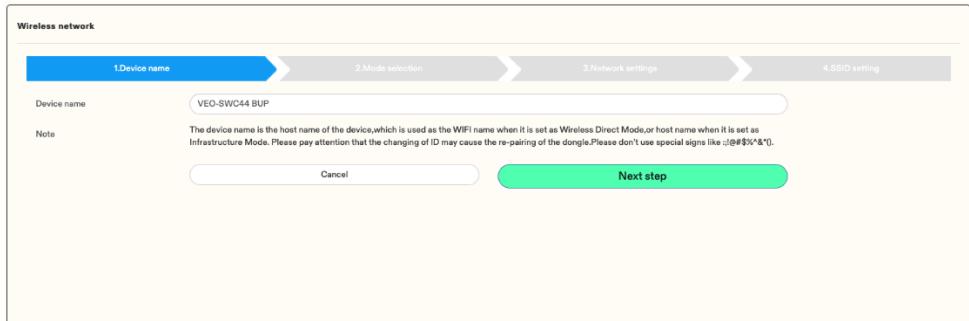

1. **Device name:** this parameter indicates current name assigned to VEO-SWC44
2. **Network mode:** this parameter tells the user which network working mode is currently configured.
3. **WiFi Mac:** this parameter shows the MAC address assigned to the VEO-SWC44 network card.
4. **Start modifying:** Click to enter a network setup wizard is available to change network working mode to properly integrate VEO-SWC44 into an existing wireless infrastructure.

⚠ Any change to Network mode will need VEO-SWC44TH and VEO-SWC44TU to be paired again with VEO-SWC44 base unit.

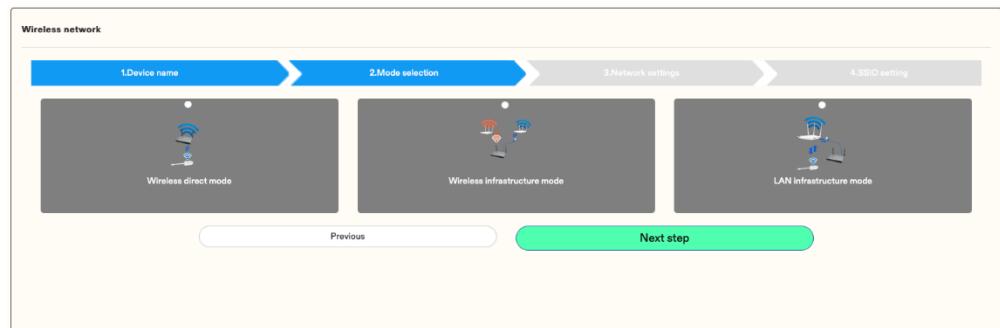

HW	Web GUI	Management & Configuration	Network Settings	Display & Audio	System Settings	Security Settings	Firmware Upgrade	PANEL FUNCTIONS & WIRELESS TRANSMITTERS	TROUBLESHOOTING	TECHNICAL DATA

6.1.1.1 Network Modes Configuration

- 1. Device Name:** Enter a device name for the Base-unit VEO-SWC44. Allowed characters are: "a-z", "A-Z", "0-9", "-", "_" and "space", then Click "Next step".

- 2. Mode Selection:** Select the desired network mode and click "Next Step".

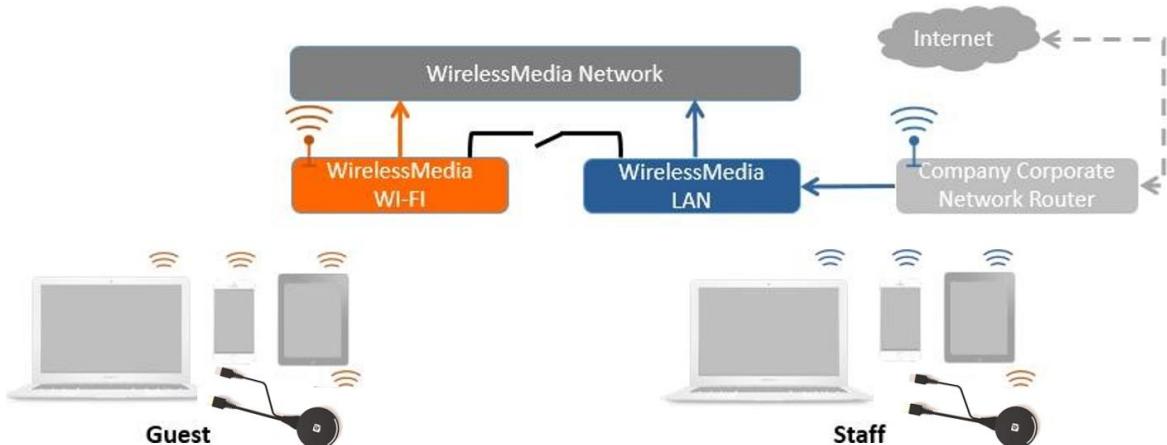

HW	Web GUI	Management & Configuration	WebGUI Setting Contents	Network Settings	Display & Audio	Install & Connect	Start-up & Operation	Firmware Update	Panel Functions & Wireless Transmitters	Troubleshooting	Technical Data
PRECAUTIONS	PACKAGE CONTENTS	DESCRIPTION & FEATURES	SETTINGS	MODERATOR CONTROL	SYSTEM SETTINGS	SECURITY SETTINGS	FIRMWARE UPGRADE	PANEL FUNCTIONS & WIRELESS TRANSMITTERS	OTHER SETTINGS	UCC DEVICE MANAGER	

- **Wireless Direct Mode**

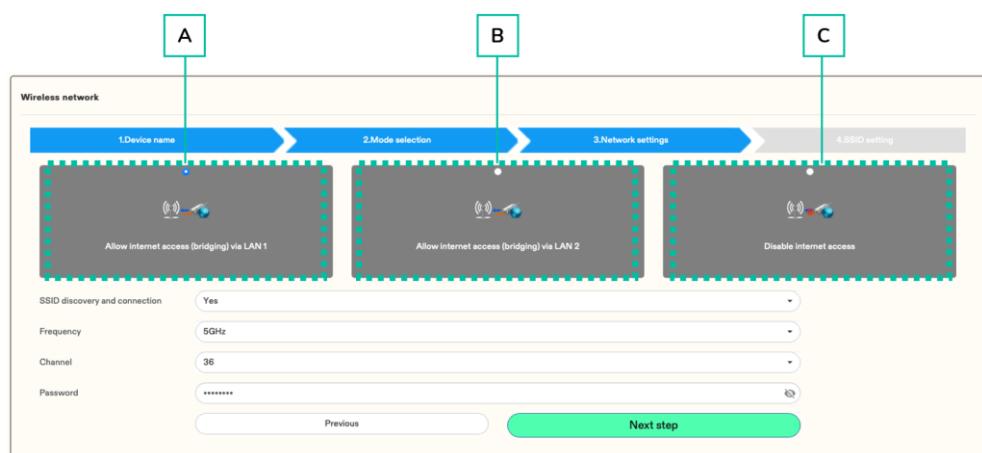

VEO-SWC44 unit starts up in the default standalone “Wireless direct mode” configuration after a factory reset or the first time it’s being used. The base unit creates its own wireless access point, which all devices need to connect in order to share content with base unit. **This option is best for temporary operation, small installations, and rooms without network access** or networks that do not allow network access for Guests, due to strict security concerns, and are completely separated from the corporate network.

Under this mode, VEO-SWC44 can work without any other wireless network configuration. Just pair VEO-SWC44TH / VEO-SWC44TU with VEO-SWC44 base unit, connect to VEO-SWC44 internal hotspot and open VEOShare app or use Airplay, Miracast or Chromecast wireless casting protocols.

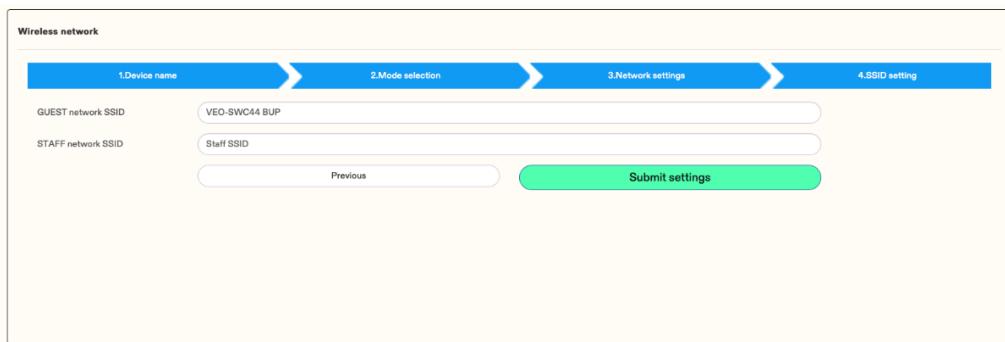

1. Click “Next step” to Set up WiFi access point.

TECHNICAL DATA	

- There are **three ways of connecting to Internet** through VEO-SWC44 in “Wireless Direct Mode”:
 - Allow internet access (bridging) via LAN 1:** the source device is able to connect to Internet if LAN1 port is available.
 - Allow internet access (bridging) via LAN 2:** the source device is able to connect to Internet if LAN2 port is available.
 - Disable internet access:** the source device is not able to connect to Internet if this mode is activated.
- **SSID discovery and connection:** Select “Yes” to make VEO-SWC44 SSID visible and “No” to hide it.
- **Frequency:** Click to select 2.4 GHz or 5 GHz WiFi frequency. Default is 5 GHz.
- **Channel:** Click to select the WiFi channel. Default is 5 GHz, Auto. If the WiFi channel is changed, no new pairing of the wireless transmitter is necessary.
 - **2.4 GHz frequency band:** channels 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11,
 - **5 GHz frequency band:** no need to choose 5G channel, system will choose proper channel automatically. Default is 5 GHz, channel: Auto.
 - **Default channel (USA area):** 36,40,44,48 or 149,153,157, 161. Four channels will be opened at the same time, system will automatically choose proper channel from them.
 - **Default channel (European area):** 36,40,44,48.
 - **Default channel (China):** 149,153,157,161.
- **Password:** Click in the input field to fill out the appropriate password with length of 8 characters.

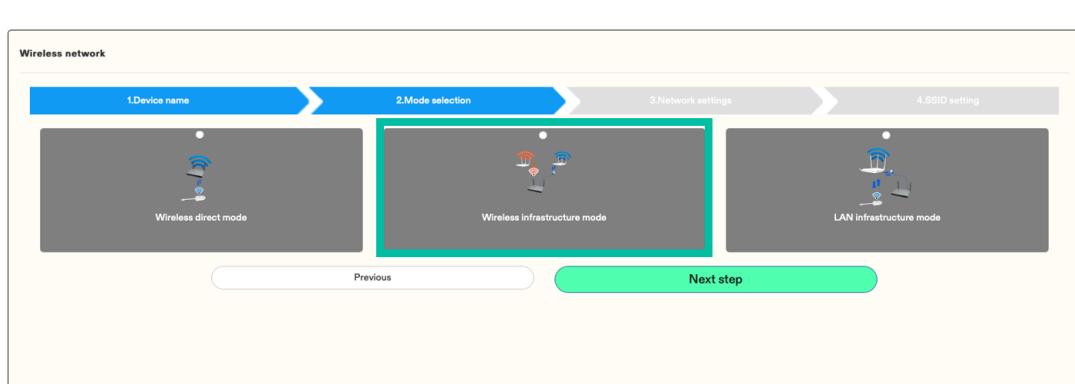

2. Click “Next step” to edit or change GUEST and STAFF network SSID. This information will be displayed at Home Screen of VEO-SWC44.

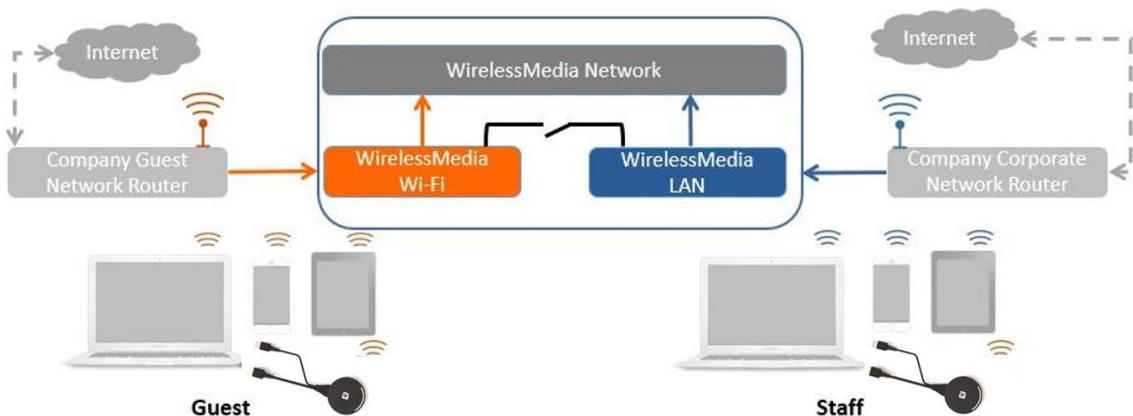

3. Click “Submit settings” to finish configuration. Then, pair wireless transmitters with the VEO-SWC44 again.

HW	Web GUI	Management & Configuration	Network Settings	Display & Audio	Moderator Control	System Settings	Security Settings	Firmware Upgrade	PANEL FUNCTIONS & WIRELESS TRANSMITTERS	TROUBLESHOOTING	UCC Device Manager	TECHNICAL DATA
PRECAUTIONS	PACKAGE CONTENTS	DESCRIPTION & FEATURES	INSTALL & CONNECT	START-UP & OPERATION	FIRMWARE UPDATE							

- **Wireless Infrastructure mode**

VEO-SWC44 can simultaneously connect to a wired and a wireless network. The segmented dual network of VEO-SWC44 provides two separated routing ways to connect to the base unit at the same time. **This is very useful for organizations, which have a wireless “Guest” network for external visitors and a wired “Staff” network for their employees.** Guest-users are not able to access any resource on the internal network of the company. Guest and Staff have internet access.

Under this mode, users will be able to present with VEO-SWC44TH / VEO-SWC44TU / VEOCast / Native Wireless protocols (Airplay, Miracast, Chromecast). VEO-SWC44TH / VEO-SWC44TU will be connected to the WiFi access point of “Guest” network, which in turn is connected to the internal WiFi access point of VEO-SWC44. (They can also be configured to connect to the enterprise’s access point.) **Mobile devices users will stay connected to their current network** thus have access to their normal corporate environment as well as Internet access.

PRECAUTIONS	PACKAGE CONTENTS	DESCRIPTION & FEATURES	INSTALL & CONNECT	START-UP & OPERATION	FIRMWARE UPDATE						

6.4.2 Date & Time

Includes Automatic date & time, Set date, Set time, Select time zone.

- Automatic date & time:** Check to use a NTP time server to provide time as system time.
- Set date:** Click in the input field to fill out the appropriate date.

- Select time zone:** Click in the Time Zone tab to select the appropriate time zone.

		Settings	Install & Connect	Start-up & Operation	System	Security	Firmware	Panel Functions & Wireless Transmitters	Troubleshooting	Technical Data	

6.4.3 Auto Standby

If the **Auto Standby** mode is activated, VEO-SWC44 will automatically switch to power saving mode, a selectable time after the last wireless transmitter was plugged out, or WiFi of a mobile unit was disconnected, or there is no operation at the system. Time is selectable from Never, up to 30 minutes. In Standby green LED in top of surface of VEO-SWC44 is flashing and HDMI-output is switched off.

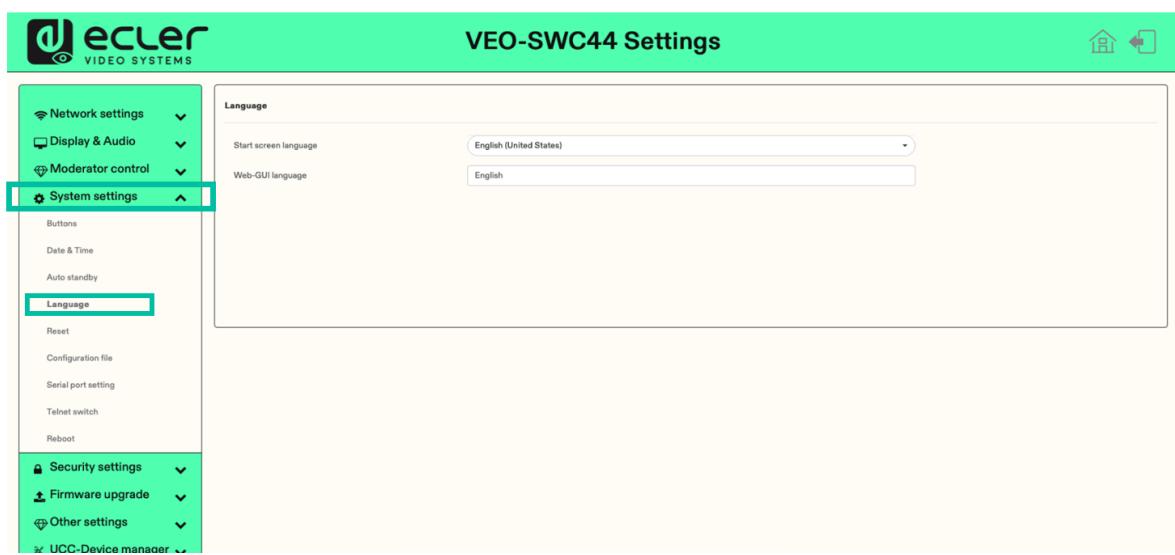

- When a VEO-SWC44TH / VEO-SWC44TU is plugged in and connected, or a mobile device is connected, Standby is deactivated.
- Movement of mouse** at USB-input at VEO-SWC44 base unit deactivates standby mode also.

6.4.4 Language

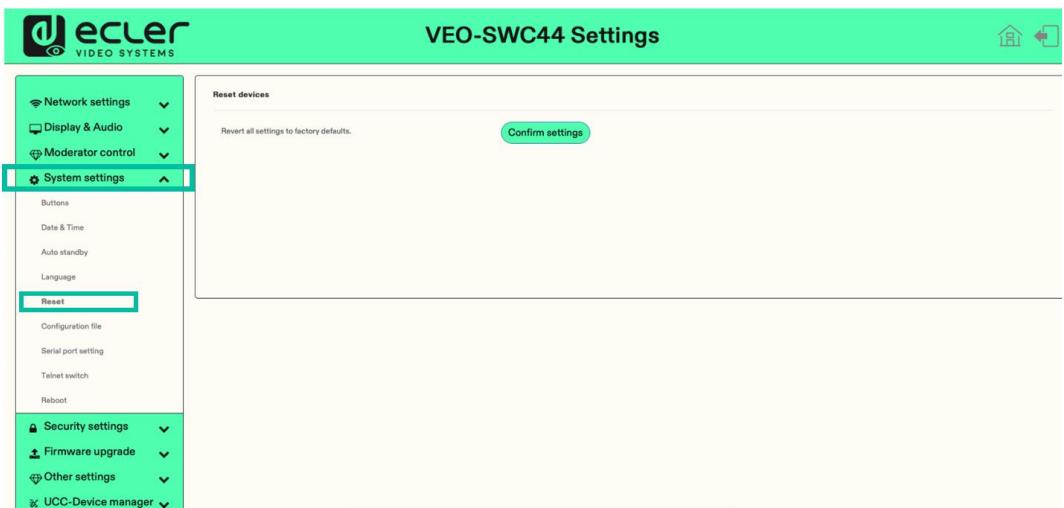

This parameter allows the user to select the display language.

PRECAUTIONS	PACKAGE CONTENTS	DESCRIPTION & FEATURES	INSTALL & CONNECT	START-UP & OPERATION	FIRMWARE UPDATE						

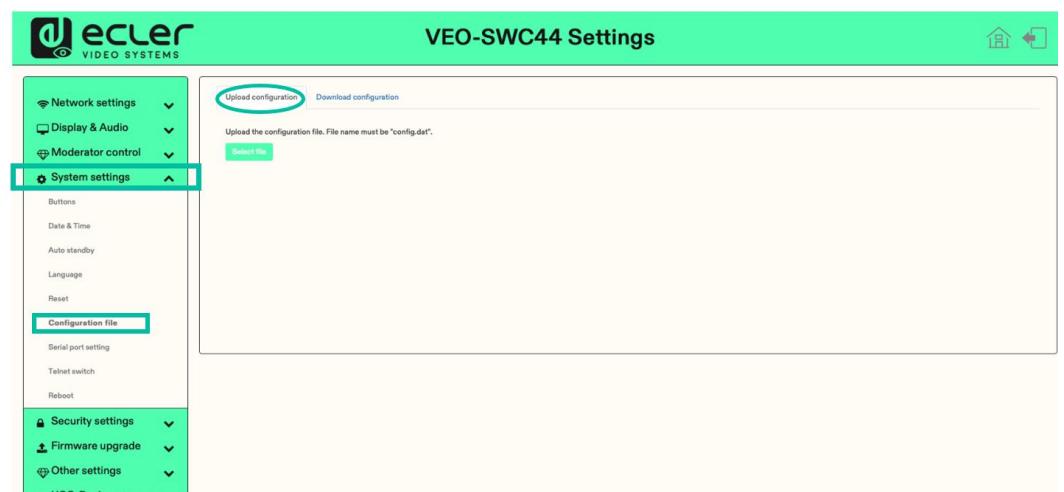

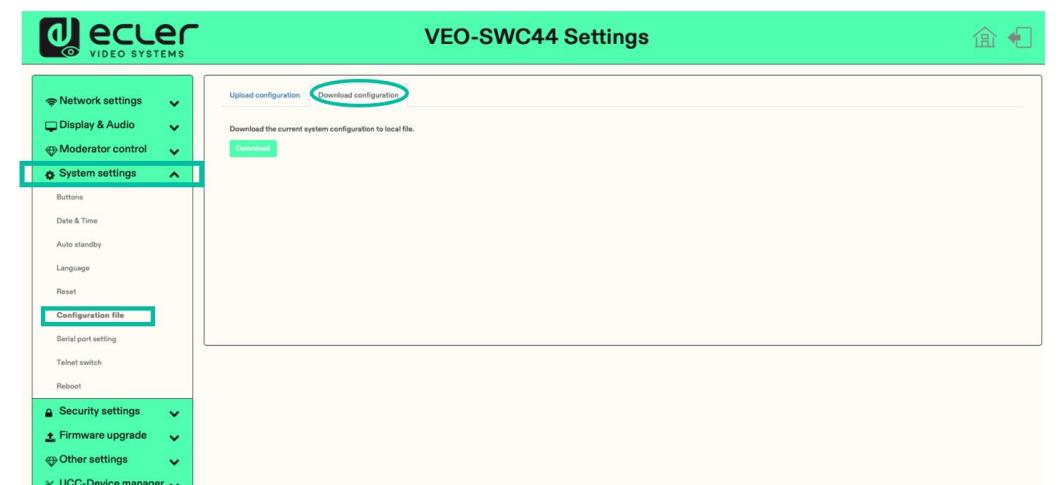

6.4.5 Reset

This parameter allows the user to **perform a Factory reset** to restore the unit.

6.4.6 Configuration File

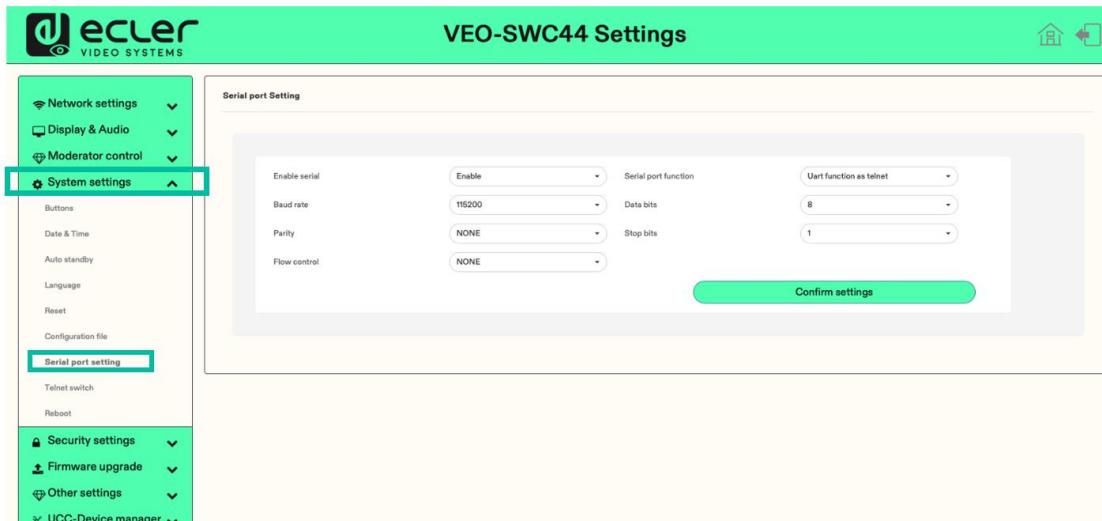

Configuration File is a **preset which can be downloaded and will save all the configuration parameters set** so they can be loaded to additional devices.

HW	Web GUI	Management & Configuration	Network Settings	Display & Audio	Moderator Control	System Settings	Security Settings	Firmware Upgrade	PANEL FUNCTIONS & WIRELESS TRANSMITTERS	TROUBLESHOOTING	TECHNICAL DATA

6.4.7 Series Port Setting

This parameter allows the user to **configure telnet command and RS-232 commands to control VEO-SWC44.**

6.4.7.1 Control commands

VEO-SWC44 can be remotely controlled over RS-232 or Telnet communications protocol.

- For **RS-232 serial communication**, enter the parameters you have selected on Series Port Setting-screen as mentioned above.
- For **Telnet communication over TCP commands**, enter the current VEO-SWC44 base unit IP address and Port: 23.

- ⚠**
- For **commands with more than one word**, a **blank space is required** between each word.
 - Commands **are not cap sensitive**.
 - For **EclerNet Manager integration**, it is important to **type commands following the next syntax example**: |tcp|<IP address>|port|\d1<command code>\r\d3|

Command Code	Description	Command Example
home	Goes back to Home Screen.	
wifi on	Turns VEO-SWC44 WiFi hotspot ON.	
wifi off	Turns VEO-SWC44 WiFi hotspot OFF.	
wifi channel	Sets VEO-SWC44 WiFi hotspot channel.

6.4.8 Telnet Switch

This section allows the user to **switch on or off the telnet function**.

6.4.9 Reboot

This section allows the user to **execute a random reboot and schedule a rebooting routine for a given week**.

The screenshot shows the 'VEO-SWC44 Settings' interface with the 'System settings' tab selected. In the 'Timing reboot' section, there is a checkbox for 'Enable' and a list of days of the week (Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday) with checkboxes next to them. Below this is a 'Reboot time' input field set to '04:00'. A note at the bottom states: 'There may be an error between the device time and the network time. Please connect to the network before each use to automatically set the device time'. At the bottom right of the page are 'Submit' and 'Reboot now' buttons.

6.5 Security Settings

6.5.1 Security Level

Based on user requirements, **three different security levels can be set** to satisfy different security requirements.

Click on the corresponding entry in the menu to adjust the respective security features. The default setting is level 1.

- **Level 1: normal safety;** keeps the security in normal and daily usage for any organization, such like classroom, regular meeting room etc.
- **Level 2: higher security;** provides increased security for companies, organizations, government agencies, etc., through powerful encryption of audio and video data; other security features include limiting the transmission of "AirPlay" by introducing a password.
- **Level 3:** is used for **strict security** requirements of companies, organizations, authorities, banks.

This level contains all "Level 2" security measures and in addition, all mobile applications as well as the web settings GUI will be blocked. In addition, the downgrade of the firmware will not be possible.

The security level will be displayed in the Home Screen clicking on the icon

PRECAUTIONS	PACKAGE CONTENTS	DESCRIPTION & FEATURES	INSTALL & CONNECT	START-UP & OPERATION	FIRMWARE UPDATE	SYSTEM UPDATES	SECURITY UPDATES	WIRELESS UPDATES	FUNCTIONS UPDATES	TESTS UPDATES	DATA UPDATES

The screenshot shows the 'VEO-SWC44 Settings' interface. On the left, there is a navigation menu with the following items: Network settings, Display & Audio, Moderator control, System settings, Security settings (which is highlighted with a green box), Firmware upgrade, Other settings, UCC-Device manager, and About device. The main content area is titled 'Security level' and contains a table with 13 rows of security items and their status across four levels: level 1 (radio button selected), level 2, level 3, and Customize. The table includes items like 'Dynamic code:Change code every', 'Encryption of Data:Proprietary', and 'Disable "Airplay"'. A small checkmark icon is located in the top right corner of the main content area.

6.5.2 Login Password

This section allows the user to change password to entering web settings GUI. Default password is “admin”.

The screenshot shows the 'VEO-SWC44 Settings' interface. On the left, there is a navigation menu with the following items:

- Network settings
- Display & Audio
- Moderator control
- System settings
- Security settings** (selected)
- Security level
- Login password** (highlighted)
- Connection password
- Firmware upgrade
- Other settings
- UCC-Device manager
- About device

The main content area is titled 'Password setting'. It contains three input fields: 'Current password', 'New password', and 'Confirm new password'. Each field has a note indicating it can have up to 16 characters. A 'Cancel password' checkbox is also present. At the bottom is a green 'Confirm settings' button.

6.5.3 Connection Password

Two type of password format can be chosen to be displayed on Home Screen.

- **4-digits password**, beginning with 0000
- **8-digits password**

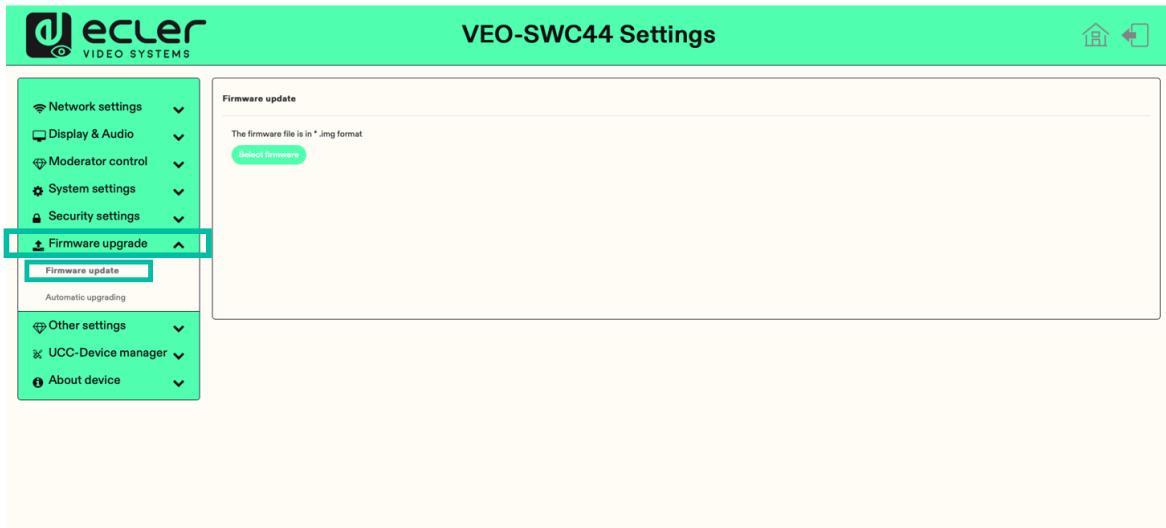

The screenshot shows the 'VEO-SWC44 Settings' interface. The navigation menu is identical to the previous screenshot. The main content area is titled 'Connection Password' and contains a single input field for 'Connection password' with a note: '4-digits password,beginning with 0000'.

6.6 Firmware Upgrade

6.6.1 Firmware Update

This section allows the user to **upload local updating files to upgrade VEO-SWC44**.

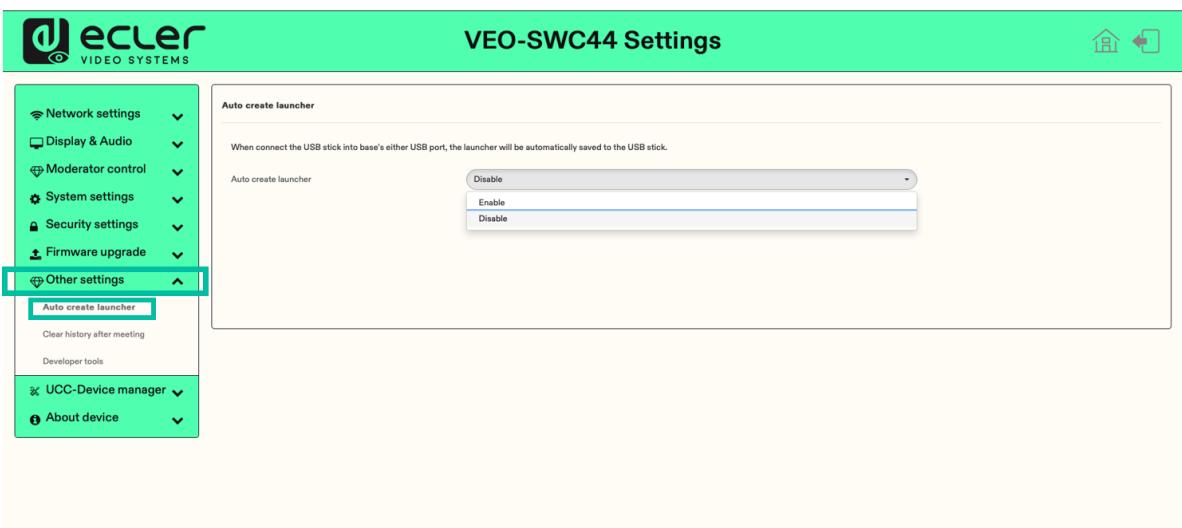

6.6.2 Automatic Upgrading

This section allows **to choose upgrading from OTA via Internet or from local files**.

6.7 Other Settings

6.7.1 Autocreate Launcher

Determines, when **using a USB memory at one USB-port of Base-unit**, the **Launcher program VEOShare will be copied automatically on USB memory**. Enable or disable this option according to your preferences.

6.7.2 Clear History After Meeting

Pictures, videos, music of mobile units will be stored in memory of Base-unit. This memory can optionally be erased, at the end of a meeting, when the wireless transmitter is pulled from the Laptop / PC.

Settings are:

- **Decide by User:** a dialog appears when wireless transmitter is pulled.
- **Never:** storage space is automatically erased when memory is filled for 90%
- **Always:** memory is automatically deleted.

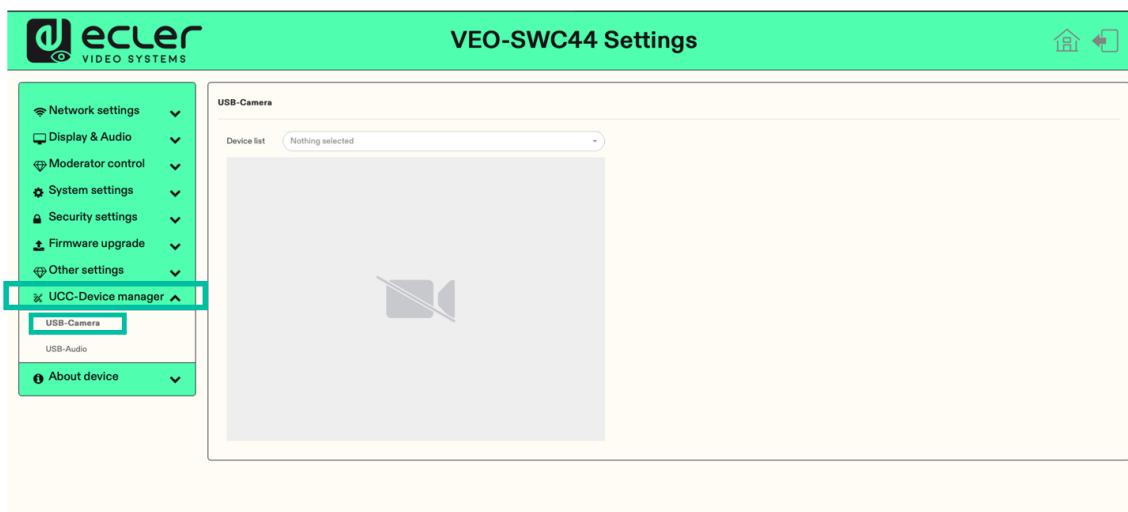

6.8 UCC Device Manager

This section allows the user to **select and monitoring UVC and UAC devices connected to the VEO-SWC44 base unit.**

6.8.1 USB Camera

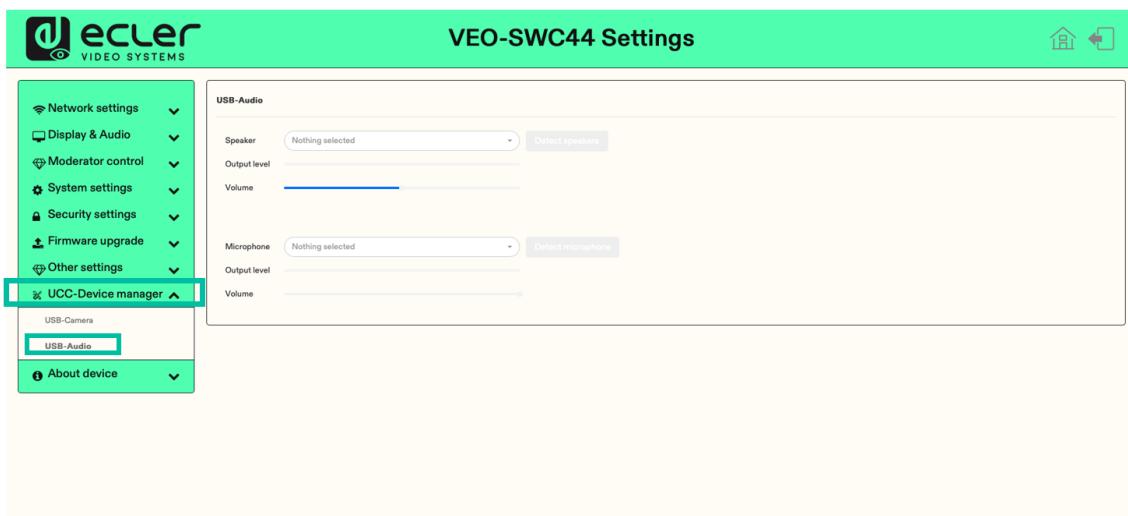

This section allows the user to **select and see a preview of the current USB video devices.**

7. FIRMWARE UPDATE

There are three different elements that can require firmware updating:

- Base unit:
 - VEO-SWC44
- Wireless transmitters:
 - VEO-SWC44TH
 - VEO-SWC44TU

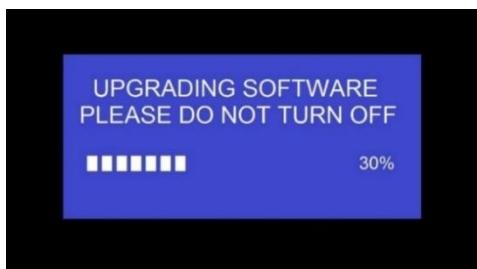

⚠ All software is stored in VEO-SWC44 base unit and later transferred to the rest of the elements. After updating the VEO-SWC44 base unit, it is necessary to check whether the other parts need to be updated as well.

7.1 Upgrading Firmware version of VEO-SWC44

- External USB storage drive:
 1. Copy the updating file “update.img” to the root directory of the USB drive.
 2. Connect the USB drive to either USB 2.0 front port of VEO-SWC44 base unit.
 3. VEO-SWC44 recognizes the “update.img”-file at the plugged-in USB stick automatically and starts the “Full Update” procedure. USB stick can be plugged out within 10 seconds to stop the update.

⚠ Do not disconnect power during upgrading progress. Otherwise, the unit firmware will be corrupted.

4. The upgrading progress displays as shown, and the VEO-SWC44 will reboot automatically after completing the updating.

⚠ During the update, screen can be temporary dark.

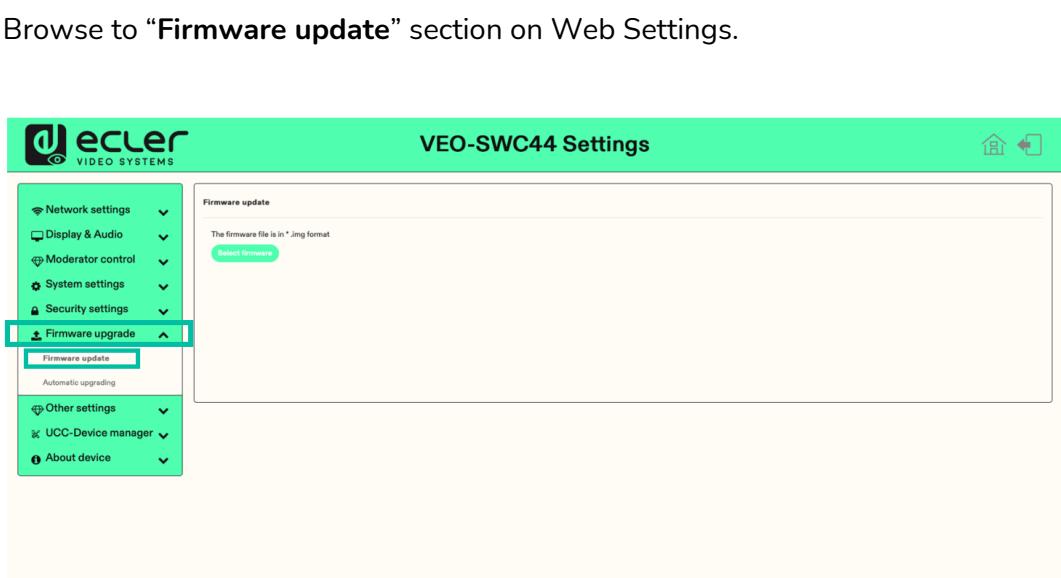

⚠ If the progress bar stops at 1%, use another USB stick, since this one may be defective.

5. The display device shows the Home Screen after normal boot of the device, you can disconnect USB stick.
6. Perform “Factory Reset” when the firmware update is completed.

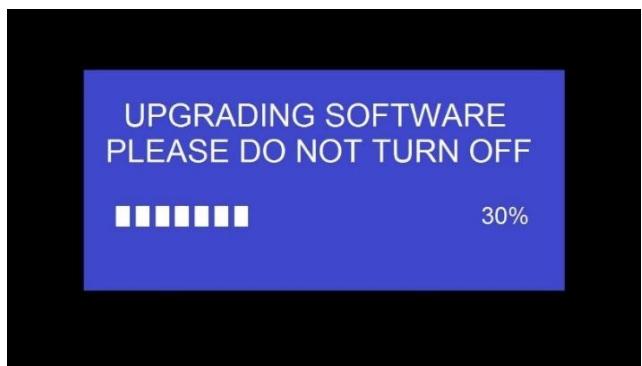

HW	Web GUI	Management & Configuration	Network Settings	Display & Audio	Moderator Control	System Settings	Security Settings	Firmware Upgrade	PANEL FUNCTIONS & WIRELESS TRANSMITTERS	TROUBLESHOOTING	UCC Device Manager	TECHNICAL DATA
PRECAUTIONS	PACKAGE CONTENTS	DESCRIPTION & FEATURES	INSTALL & CONNECT	START-UP & OPERATION	FIRMWARE UPDATE							

- **Web settings:**

1. Browse to “**Firmware update**” section on Web Settings.

2. Select a “**update.img**” file.
3. The **upgrading progress displays** as shown below, and the VEO-SWC44 will reboot automatically after completing the updating.

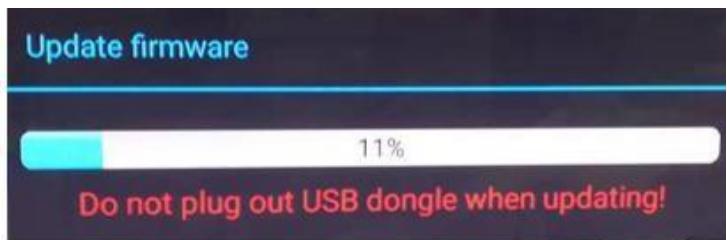

4. The **display device shows the Home Screen** after normal boot of the device,
5. Perform “**Factory Reset**” when the firmware update is completed.

7.2 Upgrading Firmware version of VEO-SWC44TH / VEO-SWC44TU

1. **Plug the VEO-SWC44TH / VEO-SWC44TU to the according USB front port of VEO-SWC44 to be updated.** It will **automatically display up a message to indicate if the installed firmware of wireless transmitter is older and needs to be upgraded.**
2. The **upgrading progress starts automatically** with the progress bar.

3. “Pairing” to the VEO-SWC44 base unit is **done automatically** afterwards.

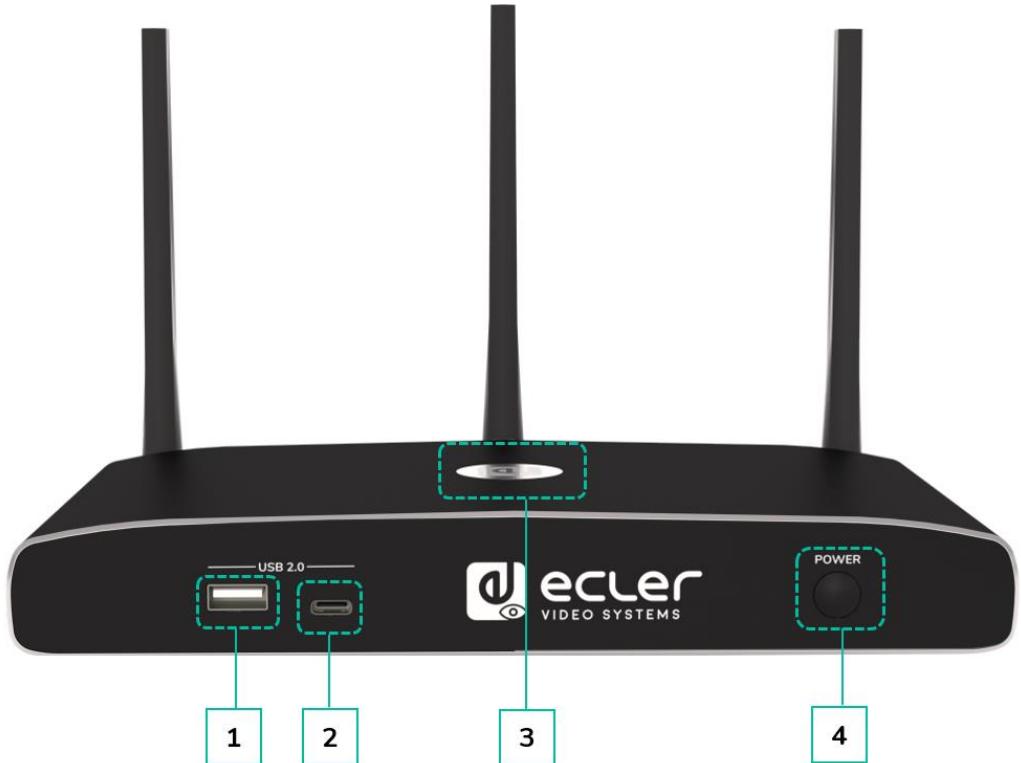

4. **Upgrading progress is finished.** Plug out the wireless transmitter (VEO-SWC44TH / VEO-SWC44TU) and **it is now ready to use.**

8. PANEL FUNCTIONS and WIRELESS TRANSMITTERS

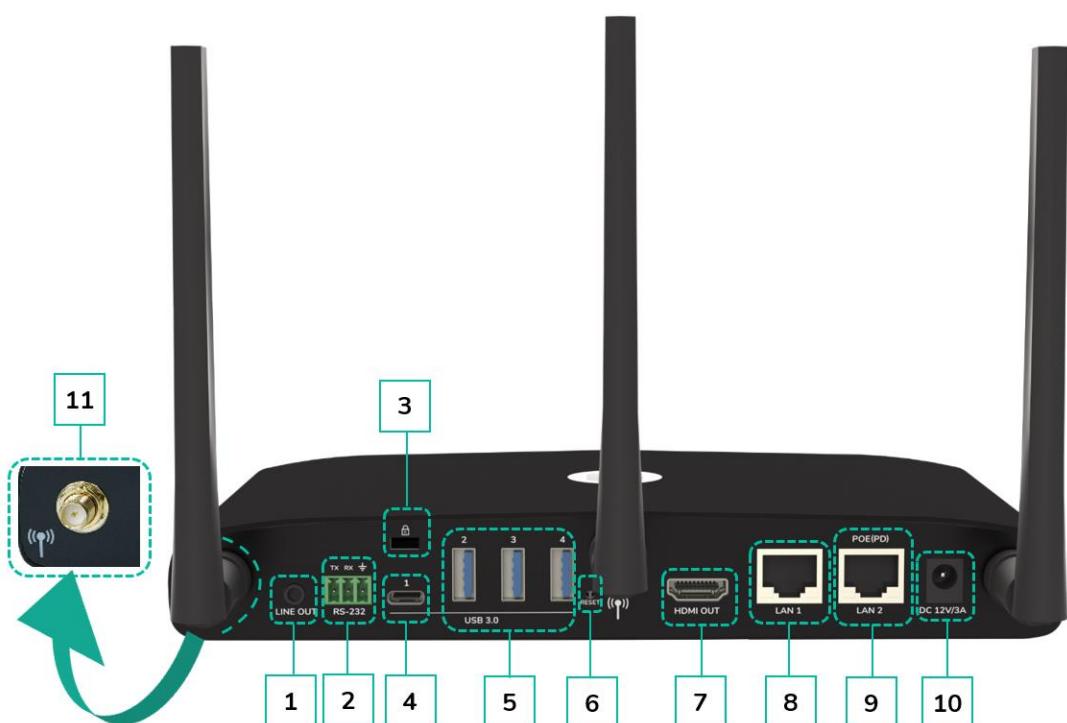

8.1 Front Panel

1. **Front USB 2.0 Type A connector:**
 - To connect USB 2.0 devices
 - To update the software of the VEO-SWC44.
 - For pairing VEO-SWC44TH and VEO-SWC44, when the transmitter is plugged-in.
2. **Front USB 3.0 Type C connector:** VEO-SWC44TU pairing.
3. **Back-lit LED indicator:**
 - **Red:** Initializing.
 - **Flashing Green:** power on.
 - **Static Green:** Ready to share.
 - **Static Cyan:** Sharing.
4. **Power Button:** Turn on or off the device.

8.2 Rear Panel

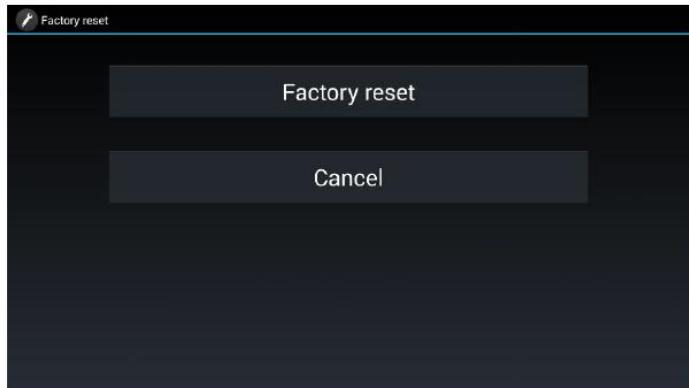

1. **Line audio output:** stereo analogue unbalanced audio output. Connect a 3.5mm mini-jack PC connector from this output to the Line in jack of an audio system.
2. **RS-232:** Connect an RS-232 cable from this port to an RS-232 device.
3. **Kensington Lock:** One end is wrapped around a fixed object and one end insert into this port to keep safety.
4. **Rear USB 3.0 Type-C connector:** To connect USB Type C devices.
5. **Rear USB 3.0 connector:** To connect USB 3.0 devices (touch screen, USB camera and mic or speaker).
6. **Reset:** Reset button to restore to the factory default setting. [For details, see chapter Factory Reset Using Rear Panel Button.](#)
7. **HDMI output:** Connect an HDMI cable from this port to an HD or 4K/HDMI2.0 display.
8. **LAN Ethernet port 1:** 100Mbps, connect an Ethernet cable between this jack and a LAN to connect the unit to LAN.
9. **LAN Ethernet port 2:** 1000Mbps, connect an Ethernet cable between this jack and a LAN to connect the unit to LAN. Support PoE.
10. **DC Power socket:** Connect the included power adapter to this socket and connect the plug to an available electrical outlet.
11. **Antenna fixing points:** Screw up the included three antennas to each of the three-attachment point. The antenna can rotate for a better covering.

8.2.1 Factory Reset Using Rear Panel Button

By using this function, all previous settings will be lost, and you will need to do the set-up once more.

Start up the VEO-SWC44. When the Home Screen is displayed, press the reset button at the rear panel of VEO-SWC44. Press this button with a pointed object, e.g., an unbent paper clip for at least 2 seconds, until the “FactoryReset” page is displayed as below.

The VEO-SWC44 will reboot after 3 seconds to be default configuration.

 If VEO-SWC44 HDMI output is not connected to a display and no picture is available, press and hold the reset button until the red LED indicator on the top surface of VEO-SWC44 lights up to execute the reset process.

Factory Default Configuration is as following:

- **Ethernet:**
 - Proxy: None
 - DHCP: Enable
- **Wireless network:**
 - Frequency: 5GHZ
 - Channel: Auto
 - Auto change WiFi hotspot password: 5 minutes
- **Display & Audio**
 - HDMI resolution: Auto
 - HDMI CEC:
 - Device auto power off: ON
 - VEO-SWC44 auto power on: OFF
 - Audio output: Jack&HDMI
 - Airplay screen quality: High
 - Display device name and password when mirroring: OFF
 - Display PCs username when mirroring: ON

8.3 Wireless Transmitters

8.3.1 VEO-SWC44TH

1. **HDMI connector:** Using HDMI connector of the button can be plugged into a PC/Laptop for sharing your screen.
2. **USB connector:** Supply power or plug into the VEO-SWC44 for pairing the Button to the VEO-SWC44 or upgrade the wireless transmitter.
3. **Touching Button:** Touch the sensor button to start displaying the content of the PC/Laptop's screen on the main screen. Touch the button during the meeting will toggle the sharing of the screen.
4. **LED ring indicator:** Indicates the status of the button. [For further information, see Led Indicator chapter.](#)

8.3.2 VEO-SWC44TU

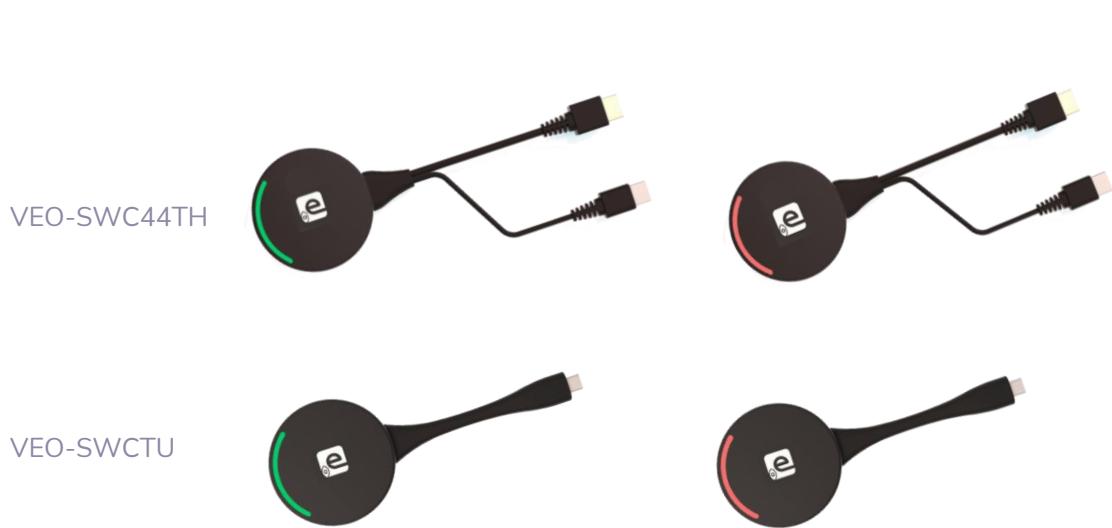

1. **Type C (DP)connector:** Using Type C (DP) connector of the button can be plugged into a PC/Laptop for sharing your screen.
2. **Touching Button:** Touch the sensor button to start displaying the content of the PC/Laptop's screen on the main screen. Touch the button during the meeting will toggle the sharing of the screen.
3. **LED ring indicator:** Indicates the status of the button. [For further information, see Led Indicator chapter.](#)

VEO-SWC44TU is full function type-C interface with DP Alt mod compliance, which supports audio and video transmission.

8.3.3 LED Indicator

- VEO-SWC44TH / VEO-SWC44TU **connected to VEO-SWC44:**

First of all, a VEO-SWC44TH / VEO-SWC44TU needs to be connected to the VEO-SWC44 base unit:

- When LED indicator is **blinking Green**: the VEO-SWC44TH / VEO-SWC44TU is pairing with VEO-SWC44 base unit or firmware upgrading.
- When LED indicator is **static red**: pairing is done. VEO-SWC44TH / VEO-SWC44TU can be unplugged and ready to use.

- VEO-SWC44TH / VEO-SWC44TU **connected to a source device:**

First of all, a VEO-SWC44TH / VEO-SWC44TU needs to be connected to the source device. For example, to a PC:

- When LED indicator is **blinking Green**: the VEO-SWC44TH / VEO-SWC44TU is plugged in the laptop and initializing.
- When LED indicator is **static green**: it is ready to mirror the PC desktop on the main screen connected to VEO-SWC44 HDMI output.
- When LED indicator is **static red**: it is mirroring the PC desktop on the screen.

9. TROUBLESHOOTING

Here you can find **some fundamental problems and possible causes**, which can be happen during the use of VEO-SWC44. Find out the problem in the table below and apply the indicated solution.

Problem	Cause	Solution
Using VEO-SWC44 for Android application in Android device or Airplay on iOS device, it can't find VEO-SWC44 device.	WiFi password of VEO-SWC44 changed when android or iOS device is connected to the WiFi of VEO-SWC44.	Reconnect the mobile by entering password displayed on Home Screen.
Image quality on the main display screen is not good.	The quality or length of the cable between the VEO-SWC44 and the display or the connection between these two.	<ul style="list-style-type: none"> Replace the cable Use another cable. Check the cable to be fasten properly.
	Improper resolution for the main screen.	Change the resolution on the Setting configuration and match it to the native resolution of the main screen. See chapter Resolution, section Display & Audio.
Bad wireless connection. The connection between the transmitter and the VEO-SWC44 is not stable.	WiFi problems. <ul style="list-style-type: none"> Interference in the radio channel. Overload in the radio channel. VEO-SWC44 does not automatically jump to other channels when there are changes in the RF environment. 	<ul style="list-style-type: none"> Use a WiFi scanner to find a free wireless frequency and channel and select it via the setting configuration. Regularly check the RF environment if there are frequently changes in WiFi networks in your environment.
	Low signal strength: <ul style="list-style-type: none"> Metal cabinets, walls, construction elements, can cause reflections deteriorating the wireless signal. Obstacles between wireless transmitters and VEO-SWC44 cause lowering of the wireless strength and quality. 	<ul style="list-style-type: none"> Put the VEO-SWC44 closer to the main screen. Change the orientation of the antennas at the rear panel of VEO-SWC44 to the transmitter direction. Remove or limit as much as possible all obstructions between the transmitters and VEO-SWC44. Avoid placing the Base-unit in (metal) cabinets, suspended ceilings, under tables or in adjoining rooms.

HW	Web GUI										
Cannot get the VEOShare run when plug the transmitter to Laptop.		When you are using VEO-SWC44" for the first time on your laptop or for guests, you must copy the Launcher program VEOShare for first on your Laptop / PC. Run this Starter-program. You can run the Starter App without Admin-rights.		There are 2 possibilities to load the Launcher program, see chapter System Settings . The best is: to download the App via LAN or WiFi of Base-unit. When the Launcher program is preinstalled one time, VEOShare is ready to use later immediately.							
		Bad connection at USB port on the Laptop.		• Reconnect to the USB port. • Try another USB port. • Reboot the Laptop.							
		Some types of USB devices might be blocked as the company policy. USB port setting on the Laptop might limit the usage of high power USB device when on battery power.		If possible, change the USB port policy on the Laptop.							
Low video performance (sharpness, audio and video dropouts, video stream is jerking, ...)		• The media-player is not ideal. • The video quality also depends on the computing power of the PC / laptop and the interaction and CPU load with other running software applications. • A laptop in battery mode can be switched to reduced computer power, to save energy. The transmission of HD video requires a certain amount of CPU power to guarantee the optimum quality of the transmission.		• Use another media-player (VLC player...), another browser. • Update the software of your Video-player to the latest version. • Reduce the CPU usage of other software applications. • Lower the screen resolution of the laptop. • Update driver of graphic card. • End low power mode at laptop.							
Video is not shown on screen	The content use HDCP			VEO-SWC44 input cannot support showing HDCP source. If possible, connect the source device to local HDMI input at VEO-SWC44.							
	The display cable (HDMI) is not correctly connected.			Insert the display cable to the display and the Base-unit.							
	The displays are switched off.			Switch on the display.							
	The VEO-SWC44 base-unit is in standby mode, "Power-LED" is flashing at VEO-SWC44 Power-supply is missed.			Power off and on again or insert a wireless transmitter into laptop.

When using Windows 7, the following message about the Window Aero colour scheme appears "Windows has detected your computer's performance is slow. This could because these are not enough resources to run the windows Aero colour scheme. To improve..."	VEO-SWC44 uses resource from the GPU. In combination with other programs which do so, Windows 7 sometimes displays this message suggesting disabling Aero to improve the performance of Laptop.										
Your content is removed from the display and the LEDs on the button are blinking.	Connection to the VEO-SWC44 is lost.										
Nothing is shown on the displays at all	The displays are switched off.										
	The display cable is not correctly connected.										
	The VEO-SWC44 is in standby mode.										
No LAN connection with the VEO-SWC44.	Wrong IP address.										
No WiFi connection between mobile device with VEO-SWC44.	Wrong WiFi frequency.										
	Wrong SSID and password										

		Web GUI

No audio when transmit local file to VEO-SWC44.	Unsupportive audio format, including Dolby MS11, DDCO DTSLBR, DTSE, SRS-THEATERSOUND, DTS_StudioSound3D, DTS_HD.	If possible, reformat it to the other audio format, like DD, DD+, HE-AAC, DTS DMP, WMA, DRA, COOK													
There is no sound at main display.	No connected audio device.	Make sure, the audio is turned on.													
	Volume is set to OFF.	Adjust the volume level at Options in menu of VEO-SWC44.													
	The volume level is set too low in the options of the VEOShare app program on PC.	Adjust the volume in the VEOShare app on PC.													
	Audio signal may be muted.	Click with right-mouse button at speaker icon in taskbar and switch on.													
	The volume level is set too low.	Adjust the volume level at Options in menu of VEO-SWC44.													
	Audio is muted in mixer of volume in taskbar.	Right-mouse click at speaker icon in taskbar, open mixer and unmute VEO-SWC44 or "Video Playback".													
	The software of used Video-player is not actual.	Update Video-player. Try another player.													
	An active virus scanner can block the Audio.	Check the filter-settings in Virus scanner. De-activate the player for a check.													
There is no sound with MacBook.	Problem of sound-flower App, which is integrated in driver VEOShare app.	• You need Admin-password. • Go to the macOS System Preferences and select the "Security & Privacy" tab. Find the "allow to run/install the sound-flower" there click on "Allow" next to "Matt Ingalls", to allow this sound-flower to install on the Mac Book. • Run the VEOShare app again, it'll auto-install the sound-flower to the MacBook.													

There is no sound via AirPlay.	The volume is set too low, on the mobile device.	Increase the volume on the mobile device.
There is no sound at main-screen, when mirroring a video by the App “VEOShare for Android”.	Due to the limit of the Android system, Android doesn't provide an interface to capture the audio. In this case, there is no sound when mirroring the video.	Use wireless transmitter or Apple Airplay to do mirroring when necessary.
Cannot update firmware of the VEO-SWC44.	Flash disk format is NTFS.	Please re-format the flash disk to be FAT format to update it.
Cannot work airplay with MacBook / iPhone / iPad.	Operation System Requirement Mac OS 10.9 iOS 8.0 and later (VEOShare app).	<ul style="list-style-type: none"> To use AirPlay, you must connect the iOS device to the WiFi of VEO-SWC44 and enable the AirPlay feature in the Control Center. Update the iOS device to a newer operating system.
Poor Video-quality with AirPlay.	<p>There are 2 states for AirPlay:</p> <p>a.) Mirroring: 1: 1 copy of the screen</p> <p>b.) Streaming: Videos (Internet, Youtube); the image will not be displayed on the iOS device.</p> <p>=> picture is jerky.</p>	Reduce “Quality” in settings of Youtube, for example from “Automatic” to 720p.
Cannot work with Android device.	Operation System Requirement Android 2.3 and later (VEOShare app).	Update to the later OS.
