

# Sub115

15 inch Direct-Radiating Subwoofer

#### **Overview**

The Sub115 is a 15 inch, vented subwoofer that is designed to provide low frequency support in installations requiring high SPLs from a compact enclosure. Its high power transducer provides a physically engaging musicality like that produced by larger systems.

The Sub115 requires digital signal processing, and many platforms are supported. The Sub115 is an excellent option any time a low profile subwoofer with robust SPL capability is needed. This makes it the perfect choice for distributed low frequency reinforcement in nightclubs, restaurants, and theme parks. It is also well suited for use in a compact DJ booth and as a VLF channel in A/V screening rooms or for multi-media playback.

#### **Technologies**

The 15 inch woofer in the Sub115 has a high power, 4 inch voice coil, and is capable of impressively large excursion. The enclosure is optimally tuned to provide maximum low frequency output in an extremely compact package.

#### **Performance Specifications**<sup>1</sup>

**Operating Mode** Single-amplified w/ DSP

Operating Range<sup>2</sup> 30 Hz to 135 Hz

Nominal Beamwidth Spherical within operating range

Transducers LF: 15.0" woofer, 4.0" voice coil; ceramic magnet

Power Handling @ Nominal Impedance <sup>3</sup> 75 V / 700 W @ 8  $\Omega$ 

Nominal Sensitivity @ Input Voltage <sup>4</sup> (half / whole space) 101 dB / 95 dB @ 2.83 V

Nominal Maximum Continuous SPL (half / whole space) 136 dB / 130 dB peak 130 dB / 124 dB continuous

Equalized Sensitivity @ Input Voltage <sup>5</sup> (half / whole space) 98 dB / 92 dB @ 2.83 V

**Equalized Maximum SPL<sup>6</sup> (half / whole space)** 132 dB / 126 dB peak 126 dB / 120 dB continuous

## Recommended Power Amplifier 700 W to 1050 W @ 8 $\Omega$

#### **Physical Specifications**

Connections (2) Neutrik NL4 Speakon Pin 1+/-: LF Pin 2+/-: NC

Mounting / Suspension Points (16) M10 eye bolt angle points

**Dimensions / Weight** See page 4

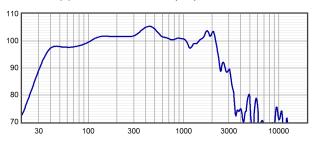

#### Finish

Black painted enclosure w/ matte black grille, or White painted enclosure w/ matte white grille

#### Options

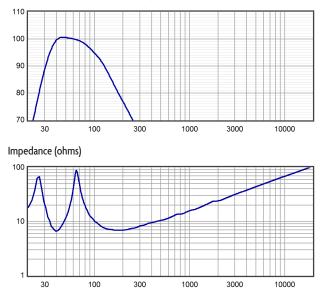

Terminal strip input, Custom color finish, Weather-resistant (WR) enclosure

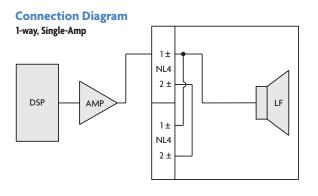

Axial Sensitivity (dB SPL, 2.83 V @ 1 m, half space) <sup>7, 8</sup>

Axial Processed Response (dB, half space)<sup>7,9</sup>

Mechanical Specification Drawings

2D and 3D DXF dimensional drawings are available for download at www.fulcrum-acoustic.com/support .

#### Notes

<sup>1</sup> **Performance Specifications** All acoustic specifications rounded to nearest whole number. External DSP with Fulcrum Acoustic-provided settings is required to achieve the specified performance.

<sup>2</sup> Operating Range The frequency range within which the processed response is within 10 dB of the average.

<sup>3</sup> Power Handling Based on the AES power handling of the transducers.

<sup>4</sup> Nominal Sensitivity The 1-meter-referenced SPL produced by a 1 watt band limited pink noise signal, with no processing applied.

<sup>5</sup> Equalized Sensitivity The 1-meter-referenced SPL produced when an EIA-426-B signal is applied to an equalized loudspeaker system, at a level which produces a total power of 1 watt, in sum, to the loudspeaker subsections.

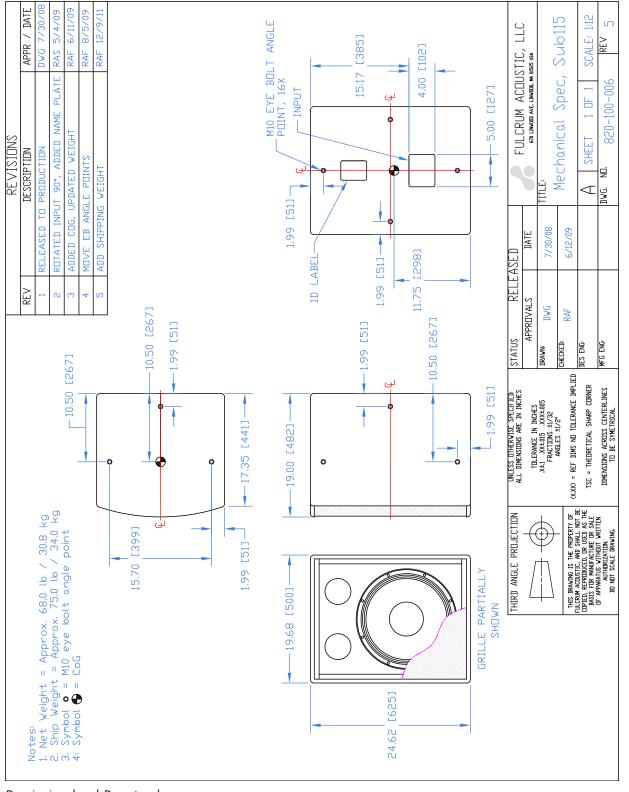

<sup>6</sup> Equalized Maximum SPL. The 1-meter-referenced SPL produced when an EIA-426-B signal is applied to an equalized loudspeaker system, at a level which drives at least one subsection to its rated power.

<sup>7</sup> Resolution All response graphs are subjected to 1/6 octave cepstral smoothing with a gaussian weighting function.

<sup>8</sup> Axial Sensitivity The SPL plotted against frequency for a 1 watt swept sine wave, referenced to 1 m with no signal processing.

<sup>9</sup> Axial Processed Response The axial magnitude response with recommended signal processing applied.
